Although the studies with 2.5 mmol/L, unbuffered, concentrated sucrose are well in line with the 10% NaCl solution, this could not easily justify limiting to around 100 mM sucrose in buffers for biological studies using sucrose as osmolyte alone. Most of our experiments were done at approximately 300 mM, the reason being that 100 mM sucrose is considered physiologically realistic even for most of the systems in biotechnology (see Buitrago-Bonilla and others 2006).

It really has been a great time, which has, the school community, been very supportive, come to school to support my teaching by going to every class, the local friends and the Christian community that responded, especially the women's community, who have been very supportive and have been a great help.
