Het geluid als een innerlijke beweging in de overdracht van een ervaring in de film : Een fenomenologische benadering Martine Huvenne, 2012-11-01. Een cineast kan een toeschouwer/luisteraar in de waarneming van een film sturen door de keuzes van de geluiden die hij wel of niet laat horen door de nuances in de geluiden zelf door de opbouw van auditieve ruimtes, de compositie van geluiden en tenslotte door de mixage. Niet alleen een geluid toevoegen of wegnemen, maar ook een kleine nuance in het geluid zelf kan een grote impact hebben op de beleving en de waarneming van een film. Huvenne wil juist dat aspect in het geluid van een film dat niet onmiddellijk wordt waargenomen, maar dat bepalend en motiverend kan zijn voor de filmwaarneming in haar geheel bespreekbaar maken en zo een bijdrage leveren aan de filmtheorie en tot de artistieke filmpraktijk.

Push Mike D'Errico, 2022. *Push: Software Design and the Cultural Politics of Music Production* shows how changes in the design of music software in the first decades of the twenty-first century shaped the production techniques and performance practices of artists working across media from hip hop and electronic dance music to video games and mobile apps. Emerging alongside developments in digital music distribution such as peer-to-peer file sharing and the MP3 format, digital audio workstations like FL Studio and Ableton Live introduced design affordances that encouraged rapid music creation workflows through flashy, user-friendly interfaces. Meanwhile, software such as Avid's Pro Tools attempted to protect its status as the industry standard professional DAW of choice by incorporating design elements from pre-digital music technologies. Other software like Cycling '74's Max asserted its alterity to commercial DAWs by presenting users with nothing but a blank screen. These are more than just aesthetic design choices. *Push* examines the social, cultural, and political values designed into music software and how those values become embodied by musical communities through production and performance. It reveals ties between the maximalist design of FL Studio, skeuomorphic design in Pro Tools, and gender inequity in the music products industry. It connects the computational thinking required by Max as well as iZotope's innovations in artificial intelligence with the cultural politics of Silicon Valley's design thinking. Finally, it thinks through what happens when software becomes hardware and users externalize their screens through the use of MIDI controllers, mobile media, and video game controllers. Amidst the perpetual upgrade culture of music technology, *Push* provides a model for understanding software as a microcosm for the increasing convergence of globalization, neoliberal capitalism, and techno-
