*Introduction to Development Engineering* Temina Madon,Ashok J. Gadgil,Richard Anderson,Lorenzo Casaburi,Kenneth Lee,Arman Rezaee,2022-09-08 This open access textbook introduces the emerging field of Development Engineering and its constituent theories methods and applications It is both a teaching text for students and a resource for researchers and practitioners engaged in the design and scaling of technologies for low resource communities The scope is broad ranging from the development of mobile applications for low literacy users to hardware and software solutions for providing electricity and water in remote settings It is also highly interdisciplinary

drawing on methods and theory from the social sciences as well as engineering and the natural sciences The opening section reviews the history of technology for development research and presents a framework that formalizes this body of work and begins its transformation into an academic discipline It identifies common challenges in development and explains the book's iterative approach of innovation implementation evaluation adaptation Each of the next six thematic sections focuses on a different sector energy and environment market performance education and labor water sanitation and health digital governance and connectivity These thematic sections contain case studies from landmark research that directly integrates engineering innovation with technically rigorous methods from the social sciences Each case study describes the design evaluation and or scaling of a technology in the field and follows a single form with common elements and discussion questions to create continuity and pedagogical consistency Together they highlight successful solutions to development challenges while also analyzing the rarely discussed failures The book concludes by reiterating the core principles of development engineering illustrated in the case studies highlighting common challenges that engineers and scientists will face in designing technology interventions that sustainably accelerate economic development Development Engineering provides for the first time a coherent intellectual framework for attacking the challenges of poverty and global climate change through the design of better technologies It offers the rigorous discipline needed to channel the energy of a new generation of scientists and engineers toward advancing social justice and improved living conditions in low resource communities around the world

**Major Infrastructure Planning and Delivery** Ben Clifford, Janice Morphet, 2023-08-01 Major Infrastructure Planning and Delivery introduces the system for planning and consenting Nationally Significant Infrastructure Projects NSIPs in England which has also applied for some schemes in Wales These are the major projects involving power stations and large renewable energy schemes motorways railways and a range of other high profile high impact and sometimes controversial development schemes and including some closely linked to the UK's transition to Net Zero The book explains where this separate system for governing major infrastructure came from and how it operates in practice with a particular focus on the relationship between planning consent and delivery of these infrastructure projects Detailed case studies of the A14 highway Thames Tideway super sewer Galloper offshore windfarm and Progress Power station drawing on research by the authors illustrate issues of the often overlooked continuing role of local government the engagement of local communities and stakeholders and the modification of schemes between consent and construction At a time of ongoing government planning reform increased concern about climate change and still unresolved consequences of Brexit as well as timeless debates such as over national need versus local impact this timely book offers rich detail on the particular approach to major infrastructure planning in England but also speaks to wider issues around the governance of development and implementation of government policy under late capitalism

**Progressive Policies for Economic Development** Alfredo Saad-Filho, 2021-07-28 Despite the unprecedented gravity of the challenges posed by global warming

most political systems have not given them the required priority The oil industry has resisted and many countries have taken only token measures to reduce emissions and mitigate the worst effects In this context this book examines the progressive options available to today's developing countries as they face the limitations of neoliberalism and the existential challenge of global warming Examining the cases of both low income fossil fuel dependent economies and large middle income economies this book argues that for all developing economies the best way forward includes green macroeconomic policies articulated with progressive industrial and social policies thus allowing these countries to achieve economic diversification build alternative drivers of growth and deliver improvements in the distribution of income wealth and power There is urgent need for this progressive policy agenda grounded on heterodox economics committed to social integration and the reduction of multiple inequalities to improve the economic outcomes for these countries improve the lives of citizens and meet global climate targets The book argues that capitalism challenges the possibility of free and dignified existence while climate change challenges the possibility of life itself and that these challenges must be confronted together Since neoliberal capitalism will not adopt the necessary policies to reduce carbon emissions rapidly it must be overthrown not only for ethical or logical reasons or to shift to better arrangements for the functioning of society but in order to preserve the conditions for life itself This agenda for progressive economic development is essential reading for anyone interested in heterodox economics development studies international politics international relations and sustainable business **The New Palgrave**
