women's reproductive intentions and their contraceptive behavior. The need for contraception remains too high. This circumstance is made worse by both a growing population and a shortage of family planning services. It is important that family planning is widely available and easily accessible. This book is intended as an aid to substance that all health workers interested in becoming more effective practitioners will consult on many occasions during their clinical practice. It provides views that the readers can test their experiences against. It presents sound and clear advice on some of the most practical guidance applicable to family planning.

HIV and Young People Gary Jones, 2015-11-30. Revisiting the thinking on vulnerability to HIV and risk of infection, this book provides better understanding by considering the risk of HIV infection alongside notions of personal and collective resilience, dignity and humiliation. The work shows that young people in the urban slum dignify their world and in doing so establish priorities and draw on a set of references oftentimes intelligible to them alone. Moreover, humiliation as an interpersonal event adds to a sense of vulnerability and lies closely behind choices directly affecting personal health and livelihood. Thus, dignity and humiliation are shown for the first time to have a critical role in health seeking and risky behavior related to HIV, and this is an area in great need of further research. The crucial focus of this work is further emphasized by the rapid growth of urban slums and high rates of HIV among both slum dwellers and young people who continue to bear the brunt of the AIDS epidemic thirty years on. This comprehensive literature review provides a compelling argument that the time is right to further explore the nexus of risk and resilience from a people-centered perspective. Fresh insight is critical to reach the goal of ending AIDS by 2030.

Religion, Women's Health Rights, and Sustainable Development in Zimbabwe: Volume 2 Sophia Chirongoma, Molly Manyonganise, Ezra Chitando, 2022-08-26. This volume brings to the fore the interface of religion, women's sexual reproductive health and rights (SRHR) and the sustainable development goals (SDGs) in Zimbabwe. It emphasizes that empowering African women is a pivotal pillar for attaining sustainable development. Contributors discuss the need for implementing structural changes as a prerequisite for social progress and development to occur in Southern Africa. They interrogate the extent to which religious beliefs and practices either promote or impede women's SRHR. The contributors also proffer several ways in which addressing the themes of health for all and equality for all women and girls can make a meaningful contribution towards the fulfillment of the goals set for Agenda 2030.

Childlessness in Bangladesh Papreen Nahar, 2021-09-21. This book examines the intersectionality and stratified lived experience of rural poor and urban middle class childless women in Bangladesh. Childless women in Bangladesh, an overpopulated country where fertility control is the primary focus of health policy, are all but nonexistent. Papreen Nahar offers an alarming account of stigma, abuse, ostracism and violence against these women sharing their experiences of marginalisation in a culture that idealises motherhood. In such a reality, the experience of childlessness, particularly for women, can be much more severe than what is defined as infertility in the biomedical sense. As childlessness is a complex interaction between biology, society and culture, the book illustrates the ways in which infertility

transforms a health problem into social suffering Although Bangladeshi childless women are systematically excluded by various structural forces it appears they do not succumb to their circumstances rather they develop resilience and agency to become survivors of their new albeit bleak lives The volume will be of interest to scholars working in anthropology reproductive and women s health global health gender studies development studies and Asian studies Thrive Sumita Singha,2023-11-15 Architecture needs women How can the built environment be designed without the expert input of half the population In spite of the significant number of women choosing to study architecture as undergraduates once qualified women remain in the minority As professionals their expertise is often overlooked their work devalued and their contribution to the canon forgotten Yet women s work is critical to the sustainability of a profession that must aspire to design high quality buildings for the whole of society How can architecture attract recruit and retain women And how can women find ways to thrive within it Underpinned by inclusion internationalism and intersectionality this practical guide looks back as well as forward exploring the history of women working in architecture as well as interrogating the contemporary landscape It provides guidance tips and examples for navigating key points in an architect s career including education practice projects and promotion Inspiring case studies of women and women led practices consider what success means and how to negotiate a route to a fruitful career and a balanced life as an architect The book covers women architects from all walks of life all sizes of practice and from all over the world including Jeanne Gang Yasmeen Lari and Anupama Kundoo as well as many other historical and contemporary women architects and emerging practices Featuring guidance on Understanding the barriers and history of women in architecture Expanding the opportunities and visibility of women in leading roles The importance of role models and mentoring With a foreword by Jane Duncan OBE PPRIBA **Sankofa: Appreciating the Past in Planning the Future of Early Childhood Education, Care and Development in Africa** UNESCO,2023-04-01
