argues that to be healthy human beings should love nature and stay in balance with it as much as possible In other words do not unbalance nature so that your own balance is not disturbed The best and healthiest way for human beings to live is to find balance in life and nature In this regard the book discusses useful nutritious functional foods nutraceuticals and antioxidants and how natural molecules which are provided by nature can be the best medicine for human beings At a molecular level stress is defined by the presence of unbalanced free radicals in the body Most diseases especially type 2 diabetes which accounts for the majority of diabetics can be traced back to this problem Our scientific evidence indicates that type 2 diabetes isn't just a disease resulting from sugar but also from stress The book seeks to promote a healthier lifestyle by considering the psychoemotional dimension of wellness And finally it contends that good sleep is at the root of health and happiness for humanity and that unbalanced free radicals are expelled from the body during restful sleep The authors hope that this book will be a helpful guide and source of peace for readers especially given their need for inner calm during the COVID 19 pandemic and that the suggestions provided will show them the way to a better life **HEALTH & SCIENCE 2025-II** Hatice Esra DURAN, 2025-08-01 CONTENTS CHAPTERS MODELING THE HUMAN BODY DIGITAL TWINS IN NEXTGENERATION PERSONALIZED MEDICINE Duygu Işıl GENCER CLINICAL DIAGNOSIS AND

Halkier,2016-05-23 In public debates communication campaigns and public policies it is increasingly common to attribute to

consumers and their agency an ability to help solve a broad array of societal problems This tendency is particularly clear in the field of food consumption owing to the fact that food is both materially and symbolically central for consumers in everyday life as well as for large scale institutionalized dynamics In order to shed light on the challenges facing food consumption this volume takes an innovative theoretical approach presenting four empirical Danish case studies which are compared with other analyses drawn from the wider international context Consumption Challenged will appeal not only to sociologists of consumption risk and the environment but also to policy makers and researchers in the fields of geography communication media governance and social psychology
