Duguid, Karsten Mündel, Daniel Schugurensky, 2013-06-12 Since most research on work focuses on paid work and most

literature on education concentrates on schools it is not surprising that studies on the relations between work and learning emphasize the relations between paid employment and organized education This unique book deals with an area that has been rarely covered in the literature on work and education the connections between volunteer work and informal learning Through a variety of examples ranging from the Red Cross to teacher labourers from cooperatives to social housing and from participatory democracy to environmental social movements this volume examines the learning dimension of volunteer work in different contexts It also considers the special case of volunteerism among recent immigrants The case studies analyze three basic types of voluntary organizations those providing social services representing local communities and mobilizing for social change The chapters include profiles of the actual work their members do and detailed accounts of the learning practices they are engaged in during their work and the impact of such learning on their personal and professional development The concluding chapter offers a comparative analysis practical recommendations and steps for further research

The Challenge of Radicalization and Extremism, 2022-10-04 This interdisciplinary volume on The Challenge of Radicalization and Extremism Integrating Research on Education and Citizenship in the Context of Migration addresses the need for educational researchers to place their work in a broader social and political context by connecting it to the current and highly relevant issue of extremism and radicalization It is just as important for researchers of extremism and radicalization to strengthen their conceptual links with educational fields especially with education for democratic citizenship as for researchers in education to get more familiar with issues of migration This book meets a current shortage of research that addresses these issues across subjects and disciplines to inform both scientific and professional stakeholders in the educational and social sectors The volume is divided into three parts The first part Foundations provides fundamental research on radicalization and the rejection of democratic values In the second part Analysis of Preconditions within the Educational Context key risk and

protective factors against radicalization for young people are explored Finally the third part Approaches for Prevention and Intervention offers concrete suggestions for prevention and intervention methods within formal and informal educational contexts The contributions show how new avenues for prevention can be explored through integrating citizenship education s twofold function to assimilate and to empower **Resources in Education** ,1992
