Patrick M. Valentine,2012-09-27 While the importance of writing has often been recognized the role of books and especially that of libraries has just as often been slighted Knowledge once generated has to be communicated preserved and accessible Books in their varying formats from clay tablets to scrolls and manuscripts to pixels have been instrumental in spreading knowledge although relatively little attention has been given to the story of books themselves A Social History of Books and Libraries from Cuneiform to Bytes traces the roles of books and libraries throughout recorded history and explores their social and cultural importance within differing societies and changing times It presents the history of books from clay tablets to e books and the history of libraries whether built of bricks or bytes Following an introduction that sets the theoretical basis for the historical importance of books and libraries chapters alternate between the history of the book and the history of libraries Included within the chapters are short excursions on some particular development such as book emblems or cataloging Case studies are given as thematic illustrations of libraries everywhere Patrick M Valentine argues that social and cultural forces have been more influential in determining the nature and status of information books and libraries than has technology But A Social History of Books and Libraries is far from a jeremiad against technology rather it presents history within the subtle yet shifting context of time and place Although written primarily for librarians and library students it will also be of interest to a wider audience of scholars and those interested in books libraries and cultural history *Beginning*

Bhattacharya,2018-06-14 This book explores the debates surrounding two dynamic fields postcolonial studies and world literature Contrary to many dominant narratives in critical theory it asserts that as an analytical framework the idea of world literature is dead the nineteenth century ideal of world literature had always and already been embedded in colonial histories and also because whatever promise that ideal held out has been exhausted by postcolonial Anglophone literature Through

fresh and incisive readings of the postcolonial canon and some of its most prominent authors like Rudyard Kipling V S Naipaul J M Coetzee and Salman Rushdie the volume discusses how these Anglophone writings have used the banal and ordinary ideal of world literature to fashion out their own trajectories Ambitious in scope this book challenges many of the existing theoretical and literary frameworks and offers a radical reimagination of the fields The volume written in an accessible and lively prose will be indispensable for scholars and researchers of literature critical theory postcolonial studies cultural studies and comparative literature Literary Territories Scott Fitzgerald Johnson, 2016-01-04 Literary Territories introduces readers to a wide range of literature from 200 900 CE in which geography is a defining principle of literary art From accounts of Holy Land pilgrimage to Roman mapmaking to the systematization of Ptolemy's scientific works Literary Territories argues that forms of literature that were conceived and produced in very different environments and for different purposes in Late Antiquity nevertheless shared an aesthetic sensibility which treated the classical inhabited world the oikoumene as a literary metaphor for the collection and organization of knowledge This type of cartographical thinking stresses the world of knowledge that is encapsulated in the literary archive The archival aesthetic coincided with an explosion of late antique travel and Christian pilgrimage which in itself suggests important unifying themes between visual and textual conceptions of space Indeed by the end of Late Antiquity the geographical mode appears in nearly every type of writing in multiple Christian languages Greek Latin Syriac and others The diffusion of cartographical thinking throughout the real world oikoumene now the Christian Roman Empire was a fundamental intellectual trajectory of Late Antiquity

Literature and Cartography Anders Engberg-Pedersen, 2017-11-24 The relationship of texts and maps and the mappability of literature examined from Homer to Houellebecq Literary authors have frequently called on elements of cartography to ground fictional space to visualize sites and to help readers get their bearings in the imaginative world of the text Today the convergence of digital mapping and globalization has spurred a cartographic turn in literature This book gathers leading scholars to consider the relationship of literature and cartography Generously illustrated with full color maps and visualizations it offers the first systematic overview of an emerging approach to the study of literature The literary map is not merely an illustrative guide but represents a set of relations and tensions that raise questions about representation fiction and space Is literature even mappable In exploring the cartographic components of literature the contributors have not only brought literary theory to bear on the map but have also enriched the vocabulary and perspectives of literary studies with cartographic terms After establishing the theoretical and methodological terrain they trace important developments in the history of literary cartography considering topics that include Homer and Joyce Goethe and the representation of nature and African cartographies Finally they consider cartographic genres that reveal the broader connections between texts and maps discussing literary map genres in American literature and the coexistence of image and text in early maps When cartographic aspirations outstripped factual knowledge mapmakers turned to textual fictions Contributors Jean Marc Besse

Vanden Eykel,2016-12-01 This study of the Protevangelium of James explores the interrelationship of authors readers texts and meaning Its central aim is to better understand how the process of repetition gave rise to the narratives of the early Christian movement and how that process continued to fuel the creativity and imagination of future generations Divided into three parts Vanden Eykel addresses first specific episodes in the life of the Virgin consisting of Mary s childhood in the Jerusalem temple PJ 7 9 her spinning thread for the temple veil PJ 10 12 and Jesus birth in a cave outside Bethlehem PJ 17 20 The three episodes present a uniform picture of how the reader s discernment of intertexts can generate new layers of meaning and that these layers may reveal new aspects of the author s meaning some of which the author may not have anticipated Island of the Day Before Umberto Eco,2014-08-29 The year is 1643 Roberto a young nobleman survives war the Bastille exile and shipwreck as he voyages to a Pacific island straddling the date meridian There he waits now alone on the mysteriously deserted Daphne separated by treacherous reefs from the island beyond the island of the day before If he could reach it time and his misfortunes might be reversed But first he must learn to swim *Italian Literature since 1900 in English Translation 1929-2016* Robin Healey,2019-03-07 Providing the most complete record possible of texts by Italian writers active after 1900 this annotated bibliography covers over 4 800 distinct editions of writings by some 1 700 Italian authors Many entries are accompanied by useful notes that provide information on the authors works translators and the reception of the translations This book includes the works of Pirandello Calvino Eco and more recently Andrea Camilleri and Valerio Manfredi Together with Robin Healey s *Italian Literature before 1900 in English Translation* also published by University of Toronto Press in 2011 this volume makes comprehensive information on translations from Italian accessible for schools libraries and those interested in comparative literature

Bioregionalism Michael Vincent McGinnis,2005-07-28 Bioregionalism is the first book to explain the theoretical and practical dimensions of bioregionalism from an interdisciplinary standpoint focusing on the place of bioregional identity within global politics Leading contributors from a broad range of disciplines introduce this exciting new concept as a framework for thinking about indigenous peoples local knowledge globalization science global environmental issues modern society conservation history education and restoration Bioregionalism s emphasis on place and community radically changes the way we confront human and ecological issues The Red Sea Alexis Wick,2016-01-19 The Red Sea has from time immemorial been one of the world s most navigated spaces in the pursuit of trade pilgrimage and conquest Yet this multidimensional history remains largely unrevealed by its successive protagonists Intrigued by the absence of a holistic portrayal of this body of water and inspired by Fernand Braudel s famous work on the Mediterranean this book brings alive a dynamic Red Sea world across time revealing the particular features of a unique historical actor In capturing this heretofore

lost space it also presents a critical conceptual history of the sea leading the reader into the heart of Eurocentrism The Sea it is shown is a vital element of the modern philosophy of history Alexis Wick is not satisfied with this inclusion of the Red Sea into history and attendant critique of Eurocentrism Contrapuntally he explores how the world and the sea were imagined differently before imperial European hegemony Searching for the lost space of Ottoman visions of the sea The Red Sea makes a deeper argument about the discipline of history and the historian's craft

Empires of Vision Martin Jay, Sumathi Ramaswamy, 2014-03-14 Empires of Vision brings together pieces by some of the most influential scholars working at the intersection of visual culture studies and the history of European imperialism The essays and excerpts focus on the paintings maps geographical surveys postcards photographs and other media that comprise the visual milieu of colonization struggles for decolonization and the lingering effects of empire Taken together they demonstrate that an appreciation of the role of visual experience is necessary for understanding the functioning of hegemonic imperial power and the ways that the colonized subjects spoke and looked back at their imperial rulers Empires of Vision also makes a vital point about the complexity of image culture in the modern world We must comprehend how regimes of visibility emerged globally not only in the metropole but also in relation to the putative margins of a world that increasingly came to question the very distinction between center and periphery Contributors Jordanna Bailkin Roger Benjamin Daniela Bleichmar Zeynep elik David Ciarlo Natasha Eaton Simon Gikandi Serge Gruzinski James L Hevia Martin Jay Brian Larkin Olu Oguibe Ricardo Padr n Christopher Pinney Sumathi Ramaswamy Benjamin Schmidt Terry Smith Robert Stam Eric A Stein Nicholas Thomas Krista A Thompson
