Human Computer Interaction Tutorial:

Human-Computer Interaction - INTERACT 2009 Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-06 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human Computer Interaction. This year INTERACT was held in Uppsala, Sweden, organized by the Swedish Interdisciplinary Interest Group for Human Computer Interaction STIMDI in cooperation with the Department of Information Technology at Uppsala University. Like its predecessors, INTERACT 2009 highlighted both to the academic and to the industrial world the importance of the human computer interaction HCI area and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals as well as newcomers to the HCI field interested in designing or evaluating interactive software, developing new interaction technologies or investigating overarching theories of HCI found in INTERACT 2009 a great forum for communication with people of similar interests to encourage collaboration and to learn. INTERACT 2009 had Research and Practice as its special theme. The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community.

Human-Computer Interaction Constantine Stephanidis, Gavriel Salvendy, 2024-09-28 The pervasive influence of technology continuously shapes our daily lives. From smartphones to smart homes, technology is revolutionizing the way we live, work, and interact with each other. Human computer interaction (HCI) is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them, ensuring the seamless integration of interactive systems into our technologically driven lifestyles. The book series contains six volumes providing extensive coverage of the field, wherein each one addresses different theoretical and practical aspects of the HCI discipline. Readers will discover a wealth of information encompassing the foundational elements, state of the art review in established and emerging domains, analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence, as well as the emergence of diverse societal needs and application domains. These books showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains. Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence (AI) and the Internet of Things (IoT). Provide an extensive exploration of interaction design by examining a wide range of technologies, interaction techniques, styles, and devices. Discuss user experience methods and tools for the design of user-friendly products and services. Bridge the gap between software engineering and human computer interaction practices for usability, inclusion, and sustainability. These volumes are an essential read for individuals interested in human computer interaction research and applications.

growth in the IFIP TC13 committee itself reflects the expansion of HCI into new worlds Membership of IFIP TC13 has risen to now include representatives of 24 IFIP member country societies from many parts of the world In 1997 IFIP TC13 breaks new ground by holding its sixth INTERACT conference in the Asia Pacific region This is a significant departure from previous INTERACT conferences that were all held in Europe and is especially important for the Asia Pacific region as HCI expands beyond its traditional base
