Recent Advances in Lichenology Dalip Kumar Upreti, Pradeep K. Divakar, Vertika Shukla, Rajesh Bajpai, 2015-02-09 This book discusses in detail molecular mycobiont culture biomonitoring and bioprospection of lichens providing insights into

advances in different fields of lichenology by applying modern techniques and approaches and examining how their application has enhanced or changed classical approaches. It offers a valuable resource especially for beginners, students and researchers from different academic backgrounds interested in the study of lichens. In recent years, the introduction of modern analytical techniques and approaches has significantly improved our understanding of the environment including lichens. Lichens are unique organisms which possess untapped potential as effective and reliable bioindicators, sources of therapeutic phytochemicals and as excellent extremophiles. The unique and peculiar characteristics of lichens underline the need for a multidimensional approach to explore their potential in various fields of environment science, botany and chemistry. Modern techniques, especially molecular techniques, have greatly enriched the field of lichen taxonomy and its position in the plant kingdom, revealing little known species and exploring their evolutionary history while multivariate analysis and GIS approaches have established lichens as an ideal and reliable tool for monitoring air pollution. Advanced culture techniques have expanded the pharmacological applications of lichens which was formerly restricted due to their small biomass. The advent of sophisticated analytical instrumentation has now facilitated the isolation and characterization of lichens' bioactive constituents even in lower concentrations as well as the estimation of their stress responses at different levels of pollution. As lichen diversity is adversely affected by increasing air pollution, there is a pressing need to develop effective management practices to conserve, restore and document lichen diversity.

Mind the Fungi Meyer, Vera, Rapp, Regine, 2020-12-23. Dieses Buch berichtet über

die Bündelung der Kreativitätsmotoren Wissenschaft und Kunst und wie daraus ein lebendiges Dreigespann aus Wissenschaft, Kunst und Gesellschaft geschmiedet werden kann. Eine schöpferische Triade, die sich über einen Zeitraum von zwei Jahren hinweg gemeinsam der Utopie verschrieben hat, eine Synthese aus nachhaltiger Wirtschaft, gesunder Umwelt und einer gerechten Gesellschaft zu ermöglichen. Das Projekt „Mind the Fungi: Achtung Pilze“ ist ein Citizen Science Forschungsvorhaben, welches aus der Kooperation der Fachgebiete für Angewandte und Molekulare Mikrobiologie und Bioverfahrenstechnik der TU Berlin sowie der Kunst- und Forschungsplattform Art Laboratory Berlin entstand und, welches Bürger:innen die Möglichkeit einer wissenschaftlichen Mitarbeit ermöglichen sollte. Das Projekt sollte einerseits einem breiten Publikum die Bedeutung der Pilzbiotechnologie für eine nachhaltige Zukunft näherbringen und andererseits hier an der TU Berlin ein Forschungsnetzwerk aufbauen, in dem unter anderem mit Citizen Scientists neuartige pilzbasierte Biomaterialien erforscht werden sollten. Die wissenschaftlichen und künstlerischen Wege im „Mind the Fungi“-Projekt, die wir gemeinsam mit der Öffentlichkeit von 2018 bis 2020 gegangen sind, so auch die Art Design Residencies, können jetzt mit diesem Buch in Texten und Bildern nachverfolgt werden. This book reports on the bundling of the creativity engines science and art and how a living triad of science, art and society can be forged from this. A creative triad which over a period of two years has jointly committed itself to the utopia of enabling a synthesis of sustainable economy, healthy environment and a just society. The project „Mind the Fungi: Achtung Pilze“ is a Citizen Science research project which resulted from the cooperation of the Departments of Applied and Molecular Microbiology and Bioprocess Engineering of the TU Berlin and the art and research platform Art Laboratory Berlin. It was intended to provide citizens with an opportunity for scientific collaboration. On the one hand, the project was intended to give a broad public an understanding of the importance of fungal biotechnology for a sustainable future and on the other hand to establish a research network here at the TU Berlin in which, among other things, novel fungus-based biomaterials were to be researched with Citizen Scientists. The scientific and artistic paths in the „Mind the Fungi“-project, which we followed together with the public from 2018 to 2020, including the Art Design Residencies, can now be traced in text and images in this book.
