## **Designing The Search Experience:**

*Designing the Search Experience* Tony Russell-Rose, Tyler Tate, 2013-01-02 Search is not just a box and ten blue links Search is a journey an exploration where what we encounter along the way changes what we seek In this book the authors weave together the theories of information seeking with the practice of user interface design

*Designing the Search Experience* Tony Russell-Rose, Tyler Tate, 2012 Search is not just a box and ten blue links Search is a journey an exploration where what we encounter along the way changes what we seek But in order to guide people along this journey designers must understand both the art and science of search In *Designing the Search Experience* authors Tony Russell Rose and Tyler Tate weave together the theories of information seeking with the practice of user interface design Understand how people search and how the concepts of information seeking information foraging and sensemaking underpin the search process Apply the principles of user centered design to the search box search results faceted navigation mobile interfaces social search and much more Design the cross channel search experiences of tomorrow that span desktop tablet mobile and other devices

*Understanding and Evaluating Search Experience* Maria Stone, 2022-05-31 This book is intended for anyone interested in learning more about how search works and how it is evaluated We all use search it s a familiar utility Yet few of us stop and think about how search works what makes search results good and who if anyone decides what good looks like Search has a long and glorious history yet it continues to evolve and with it the measurement and our understanding of the kinds of experiences search can deliver continues to evolve as well We will discuss the basics of how search engines work how humans use search engines and how measurement works Equipped with these general topics we will then dive into the established ways of measuring search user experience and their pros and cons We will talk about collecting labels from human judges analyzing usage logs surveying end users and even touch upon automated evaluation methods After introducing different ways of collecting metrics we will cover experimentation as it applies to search evaluation The book will cover evaluating different aspects of search from search user interface UI to results presentation to the quality of search algorithms In covering these topics we will touch upon many issues in evaluation that became sources of controversy from user privacy to ethical considerations to transparency to potential for bias We will conclude by contrasting measuring with understanding and pondering the future of search evaluation
