### **The Routledge Handbook of German**

**Language Teaching** Ruth Whittle, 2024-09-16 The Routledge Handbook of German Language Teaching evaluates and addresses multifaceted multilevel needs of students and teachers within teaching German as a foreign as well as a second language through taking a transcultural approach. Each contribution starts with the author situating themselves in the geographical and institutional context in which they teach as well as the way in which they teach for example in person or online. This acknowledges the Handbook's internationally widespread contributors from countries with different histories in terms of cultural linguistic and educational diversity more generally and the teaching of German in particular. The chapters reflect their voices and consider language learners as people who have their own identities. Material such as plays, poems, short literary texts, rap, singing and drawing are discussed in this book as being influential for language learners from beginner level and beyond. This book proposes that learning happens by both the teachers and the learners going on a journey and both changing the outlook on each other and themselves along that journey. Alongside this, questions are asked with respect to curricula and the relation between speaking German and belonging in a German speaking country. This Handbook will primarily appeal to teachers and instructors of German as well as those training to become German language instructors. Moreover, the book will appeal to researchers interested in the linguistic and theoretical aspects of German language teaching.

**Race, Language, and Subjectivation** Liesa Rühlmann, 2023-10-28 Many school students in Germany are plurilingual and use German and further languages in their daily lives. This use is differently approached and valued. Not only languages spoken but race too plays a role in how language use is addressed in schools. Interviews that were conducted and analyzed with a Grounded Theory approach show that subject positions assigned to students concerning plurilingualism shape how they reflect on experiences in school from a retrospective focus. By turning to a raciolinguistic perspective and drawing on subjectivation theory, the terms used to signify dominantly found repositionings are raciolinguistic norm and raciolinguistic Other. The results highlight the necessity of focusing in more detail on how listening positionalities shape language use in society and in schools specifically.
