ICASI 2019 Rahmat Hidayat, Mesran, Tengku Mohd Diansyah, Supriyanto, Dodi Siregar, 2019-11-26 As an annual event THE 2ND INTERNATIONAL CONFERENCE ON ADVANCE SCIENTIFIC INNOVATION 2019 continued the agenda to bring together researcher academics experts and professionals in examining about Scientific Innovation in technology education management accounting and many aspect area In 2019 this event held in 18 July 2019 at Politeknik Kutaraja Banda Aceh Indonesia This ICASI Proceeding 2019 are published along with article from ICASI 2018 and each contributed paper was refereed before being accepted for publication The double blind peer reviewed was used in the paper selection

Microelectronics, Electromagnetics and Telecommunications Ganapati Panda, Suresh Chandra Satapathy, Birendra Biswal, Ramesh Bansal, 2018-11-02 The book discusses the latest developments and outlines future trends in the fields of microelectronics electromagnetics and telecommunication It contains original research works presented at the International Conference on Microelectronics Electromagnetics and Telecommunication ICMEET 2018 organised by GVP College of Engineering A Andhra Pradesh India The respective papers were written by scientists research scholars and practitioners from leading universities engineering colleges and R D institutes from all over the world and share the latest breakthroughs in and promising solutions to the most important issues facing today s society **Biofuels and Sustainability** Kazuhiko Takeuchi, Hideaki Shiroyama, Osamu Saito, Masahiro Matsuura, 2018-07-13 This open access book presents a comprehensive analysis of biofuel use strategies from an interdisciplinary perspective using sustainability science This interdisciplinary perspective social science natural science means that the strategies and policy options proposed will have significant impacts on the economy and society alike Biofuels are expected to contribute to reducing greenhouse gas emissions revitalizing economies in agricultural communities and alleviating poverty However despite these anticipated benefits international organizations such as the FAO OECD and UN have published reports expressing concerns that biofuel promotion may lead to deforestation water pollution and water shortages The impacts of biofuel use are extensive cross sectoral and complex and as such comprehensive analyses are required in order to assess the extent to which biofuels can contribute to sustainable societies Applying interdisciplinary sustainability science concepts and methodologies the book helps to enhance the establishment of a sustainable society as well as the development of appropriate responses to a global need for urgent action on current issues related to biofuels *Africa in a Changing Global Environment* Mutanga, Shingirirai Savious, Simelane, Thokozani, Pophiwa, Nedson , 2013-10-20 Africa is one continent severely affected by the ravaging effects of global environment change yet it is least responsible for this The continent s rural and urban poor are particularly vulnerable to reduced agricultural production worsening food security increased incidence of both flooding and drought spreading of disease and heightening risk of conflict over scarce land and water resources As such this timely book consisting of chapters authored by scholars from multidisciplinary backgrounds provides the reader a variety of contexts from which to understand

the impacts of global environmental change and how affected African communities are adapting and mitigating the scourge. In addition, it discusses different models for mitigation and adaptation applicable to local contexts.

Micro Perspectives for Decentralized Energy Supply Martina Schäfer, 2011

Engineering for Sustainable Development and Living Jacqueline A. Stagner, David S-K. Ting, 2021-05-01

What can we do to preserve a future for the next generation to cherish? A potent answer is to exercise good stewardship in realizing more sustainable living and development. This volume brings together experts from around the world to disseminate the latest knowledge and research toward this end, i.e., engineering for more sustainable development and living. Let us learn from a living cell that utilizes inherited biological intelligence to organize its resources for current needs and future existence. We also have the responsibility to ensure universal access to electricity and increase the share of renewable energies. Cost-effective hybrid renewable energy systems should also be considered and furthered. Advancing energy storage is a necessary striving for managing a future toilet paper crisis. More accurate accounting of weather is crucial in furthering energy efficiency for human thermal comfort. With cooling making up the highest energy cost in many medical structures, combining low-energy building strategies with source-efficient and low-cost manufacturing envelopes can contribute effectively to mitigating climate change. To realize calculated improvements in practice, we must assess the performance after implementation of the promising measures. Construction is definitely the right place to start incorporating sustainable development and living. Another means to promote sustainability is to improve engineering system performance. Simple means such as a rightly positioned cylindrical rod can enhance systems that involve heat exchangers. An important lesson came through dealing with COVID-19, teaching us to provide adaptation strategies through water-energy-food nexus planning, building resilient communities for tomorrow.

[Energy Transition in Africa](#) Thokozani Simelane, Mohamed Abdel-Rahman, 2012-03-25

The world's demand for energy coupled with a decreasing stock and supply of fossil fuels is propelling the transition to renewable sources of energy. This global movement presents many opportunities and challenges to Africa. If Africa can identify the opportunities and start to position itself with its abundant sources of renewable energy, it stands a chance of being a global player in the production and supply of renewable energy. Achieving this will, however, require a combination of effective planning and investment in infrastructure, skills, and technology. In determining how this should be done, this publication has brought together some of Africa's leading experts in the field. The book sets out a foundation for Africa's role in harnessing renewable energy by highlighting an ideal mix of investment, resource use, skills development, and infrastructure management, which the authors believe Africa needs in order to migrate successfully to a green economy that is supported by renewable energy. In policy terms, a pan-African approach is required to drive African policy on renewable energy that will cater for Africa's economies. This should also demonstrate a political will to carry the policy through and to establish an environment that encourages private investment as well as providing access to carbon credit finances. In this new era of what has been

termed the second scramble for Africa the authors views on Africa s potential to supply renewable energy present hope that Africa can lead in the supply of renewable energy **Energy, Environment, and Sustainable Development** ,2002
