

The background of the cover is a photograph of a tropical forest clearing. In the foreground, two people are sitting on the ground, their backs to the camera, looking towards a small, simple wooden structure in the middle ground. The structure appears to be made of logs or branches. The forest is dense with tall trees and lush vegetation. The overall tone is somewhat somber and contemplative.

Balick, 2006 Of late religion seems to be everywhere suffusing U S politics and popular culture and acting as both a unifying and a divisive force This collection of manifestos Supreme Court decisions congressional testimonies speeches articles book excerpts pastoral letters interviews song lyrics memoirs and poems reflects the vitality diversity and changing nature of religious belief and practice in American public and private life over the last half century Encompassing a range of perspectives this book illustrates the ways in which individuals from all along the religious and political spectrum have engaged religion and viewed it as a crucial aspect of society The anthology begins with documents that reflect the close relationship of religion especially mainline Protestantism to essential ideas undergirding Cold War America Covering both the center and the margins of American religious life this volume devotes extended attention to how issues of politics race gender and sexuality have influenced the religious mainstream A series of documents reflects the role of religion and theology in the civil rights feminist and gay rights movements as well as in conservative responses Issues regarding religion and contemporary American culture are explored in documents about the rise of the evangelical movement and the religious right the impact of new post 1965 immigrant communities on the religious landscape the popularity of alternative New Age and non Western beliefs and the relationship between religion and popular culture The editors conclude with selections exploring major themes of American religious life at the millennium including both conservative and New Age millennialism as well as excerpts that speculate on the future of religion in the United States The documents are grouped by theme into nine chapters and arranged chronologically therein Each chapter features an extensive introduction providing context for and analysis of the critical issues raised by the primary sources

*Human Impacts on Amazonia* Darrell A. Posey, Michael J. Balick, 2006-08-04 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan In this carefully crafted volume Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons surveys the major debates related to that decision and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945 He then provides a historical overview of the events in question beginning with the decision and program to build the atomic bomb Detailing the sequence of events leading to Japan's surrender he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders Finally Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents scholarly books and articles

Sacred Ecology Fikret Berkes, 2017-09-01 Sacred Ecology examines bodies of knowledge held by indigenous and other rural peoples around the world and asks how we can learn from this knowledge and ways of

knowing Berkes explores the importance of local and indigenous knowledge as a complement to scientific ecology and its cultural and political significance for indigenous groups themselves With updates of relevant links for further learning and over 180 new references the fourth edition gives increased voice to indigenous authors and reflects the remarkable increase in published local observations of climate change Amazonian Dark Earths Johannes Lehmann,Dirse C. Kern,Bruno Glaser,William I. Woods,2006-02-25 Amazonian Dark Earths are not only a testament to the vanished civilizations of the Amazon Basin but may provide the answer to how the large sophisticated societies were able to sustain intensive agriculture in an environment with mostly infertile soils Locally known as Terra Preta de Indio or Indian black earth these anomalous soils are even today fertile and highly productive Though clearly associated with pre European settlements questions remain whether the Dark Earths were intentionally produced or merely a by product of habitation activities This publication provides a comprehensive review of our current understanding of these fascinating soils their origin properties and management through time These new and multidisciplinary perspectives by leading experts on Amazonian Dark Earths may pave the way for the next revolution of soil management in the humid tropics **Bibliographic Index** ,2009 **Forest, Field, and Fallow** Antoinette M.G.A. WinklerPrins,Kent Mathewson,2021-01-12 This volume aims to present the essential work of geographer and historical ecologist William M Denevan to explain the impact and influence his thinking had on the conceptual advancement not only in his own discipline but in a range of related disciplines such as anthropology archaeology and environmental history The book is organized around eight themes demonstrating Denevan s early and profound insights on topics that remain of current relevance today and the scholarly impact his writing had on subsequent scholarship The book is unique because it offers commentary from active scholars who address the impacts of Prof Denevan s thinking and work on contemporary environmental and ecological issues with a focus on several groundbreaking themes e g historical demography agricultural landforms cultural plant geography human environmental impacts indigenous agro ecology tropical agriculture livestock and landscape and synthetic contributions This book will be of interest to a range of scholars in geography anthropology archaeology history and ecology as well as to environmental managers and practitioners especially those working for non profit organizations and government organizations tasked with finding ways to adapt to global environmental change Forests, Water and People in the Humid Tropics M. Bonell,L. A. Bruijnzeel,2009-12-17 Forests Water and People in the Humid Tropics is a comprehensive review of the hydrological and physiological functioning of tropical rain forests the environmental impacts of their disturbance and conversion to other land uses and optimum strategies for managing them The book brings together leading specialists in such diverse fields as tropical anthropology and human geography environmental economics climatology and meteorology hydrology geomorphology plant and aquatic ecology forestry and conservation agronomy The editors have supplemented the individual contributions with invaluable overviews of the main sections and provide key pointers for future research Specialists will find authenticated detail in

chapters written by experts on a whole range of people water land use issues managers and practitioners will learn more about the implications of ongoing and planned forest conversion while scientists and students will appreciate a unique review of the literature *American Book Publishing Record* ,2005 **Ecological Restoration** Andre F. Clewell,James

Aronson,2012-07-26 The field of ecological restoration is a rapidly growing discipline that encompasses a wide range of activities and brings together practitioners and theoreticians from a variety of backgrounds and perspectives ranging from volunteer backyard restorationists to highly trained academic scientists and professional consultants Ecological Restoration offers for the first time a unified vision of ecological restoration as a field of study one that clearly states the discipline s precepts and emphasizes issues of importance to those involved at all levels In a lively personal fashion the authors discuss scientific and practical aspects of the field as well as the human needs and values that motivate practitioners The book identifies fundamental concepts upon which restoration is based considers the principles of restoration practice explores the diverse values that are fulfilled with the restoration of ecosystems reviews the structure of restoration practice including the various contexts for restoration work the professional development of its practitioners and the relationships of restoration with allied fields and activities A unique feature of the book is the inclusion of eight virtual field trips short photo essays of project sites around the world that illustrate various points made in the book and are led by those who were intimately involved with the project described Throughout ecological restoration is conceived as a holistic endeavor one that addresses issues of ecological degradation biodiversity loss and sustainability science simultaneously and draws upon cultural resources and local skills and knowledge in restoration work **Development Cooperation Policy in Forestry from an**

**Analytical Perspective** Peter Aurenhammer,2012-10-02 Any reader eager to gain a comprehensive insight into forest development policy praxis and reality shouldn t miss this excellent publication Hard to find a comparable reading where the author is digging as deep into Forest Development Policy The author discovered numerous highly relevant theories as well as inspiring cases about forests and people from around the world focusing on change rather than development and on the role of various actors in creating or preventing change The exciting results uncover reality and lead to inspiring discussions on concepts of development cooperation All individual theoretical arguments and empirical proofs are well based and shed light into the political process of Forest Development Policy The book is an essential contribution to scholarly debate and research on forestry in the South and its relations to development cooperation for both readers with theoretical and practice related interests **The Physical Geography of South America** Thomas T. Veblen,Kenneth R. Young,Antony R. Orme,2015-04-01

The Physical Geography of South America the eighth volume in the Oxford Regional Environments series presents an enduring statement on the physical and biogeographic conditions of this remarkable continent and their relationships to human activity It fills a void in recent environmental literature by assembling a team of specialists from within and beyond South America in order to provide an integrated cross disciplinary body of knowledge about this mostly tropical continent

together with its high mountains and temperate southern cone The authors systematically cover the main components of the South American environment tectonism climate glaciation natural landscape changes rivers vegetation animals and soils The book then presents more specific treatments of regions with special attributes from the tropical forests of the Amazon basin to the Atacama Desert and Patagonian steppe and from the Atlantic Caribbean and Pacific coasts to the high Andes Additionally the continents environments are given a human face by evaluating the roles played by people over time from pre European and European colonial impacts to the effects of modern agriculture and urbanization and from interactions with El Niño events to prognoses for the future environments of the continent

*Conservation* Monique Borgerhoff Mulder, Peter Coppolillo, 2018-06-05 Nearly 90 percent of the earth's land surface is directly affected by human infrastructure and activities yet less than 5 percent is legally protected for biodiversity conservation and even most large protected areas have people living inside their boundaries In all but a small fraction of the earth's land area then conservation and people must coexist Conservation is a resource for all those who aim to reconcile biodiversity with human livelihoods It traces the historical roots of modern conservation thought and practice and explores current perspectives from evolutionary and community ecology conservation biology anthropology political ecology economics and policy The authors examine a suite of conservation strategies and perspectives from around the world highlighting the most innovative and promising avenues for future efforts Exploring highlighting and bridging gaps between the social and natural sciences as applied in the practice of conservation this book provides a broad practically oriented view It is essential reading for anyone involved in the conservation process from academic conservation biology to the management of protected areas rural livelihood development to poverty alleviation and from community based natural resource management to national and global policymaking

**Ethnozoology** Romulo Romeu Nobrega Alves, Ulysses Paulino Albuquerque, 2017-10-23 Ethnozoology Animals In Our Lives represents the first book about this discipline providing a discussion on key themes on human animal interactions and their implications along with recent major advances in research Humans share the world with a bewildering variety of other animals and have interacted with them in different ways This variety of interactions both past and present is investigated through ethnozoology which is a hybrid discipline structured with elements from both the natural and social sciences as it seeks to understand how humans have perceived and interacted with faunal resources throughout history In a broader context ethnozoology and its companion discipline ethnobotany form part of the larger body of the science of ethnobiology In recent years the importance of ethnozoological ethnobiological studies has increasingly been recognized unsurprisingly given the strong human influence on biodiversity From the perspective of ethnozoology the book addresses all aspects of human connection animals and health from its use in

traditional medicine to bioprospecting derivatives of fauna for pharmaceuticals with expert contributions from leading researchers in the field Draws on editors and contributors extensive research experience and studies covering ethnozoology and ethnobiology Covers all aspects of human animal interaction through the lens of this emerging discipline with coverage of both domestic and wild animal topics Presents topics of great interest to a variety of researchers including those in wildlife conservation biologists ecologists conservationists and domestic related disciplines psychologists sociologists

*Nature Across Cultures* Helaine Selin, 2013-04-17 *Nature Across Cultures* Views of Nature and the Environment in Non Western Cultures consists of about 25 essays dealing with the environmental knowledge and beliefs of cultures outside of the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Indian Thai and Andean views of nature and the environment among others the book includes essays on Environmentalism and Images of the Other Traditional Ecological Knowledge Worldviews and Ecology Rethinking the Western non Western Divide and Landscape Nature and Culture The essays address the connections between nature and culture and relate the environmental practices to the cultures which produced them Each essay contains an extensive bibliography Because the geographic range is global the book fills a gap in both environmental history and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups

**Continuity and Change in Cultural Adaptation to Mountain Environments** Ludomir R Lozny, 2013-03-12 Up until now mountain ecosystems have not been closely studied by social scientists as they do not offer a readily defined set of problems for human exploitation as do for instance tropical forests or arctic habitats But the archaeological evidence had shown that humans have been living in this type of habitat for thousands of years From this evidence we can also see that mountainous regions are often frontier zones of competing polities and form refuge areas for dissident communities as they often are inherently difficult to control by centralized authorities As a consequence they fuel or contribute disproportionately to political violence But we are now witnessing changes and increasing vulnerability of mountain ecosystems caused by human activities Human adaptability to mountain ecosystems This volume presents an international and interdisciplinary account of the exploitation of and human adaptation to mountainous regions over time The contributions discuss human cultural responses to key physical and cultural stressors associated with mountain ecosystems such as aridity quality of soils steep slopes low productivity as well as transient phenomena such as changing weather patterns deforestation and erosion and the possible effects of climate change This volume will be of interest to anthropologists ecologists and geologists as mountainous landscapes change fast and cultures disappear and they need to be recorded and mountain regions are of interest for studies on environmental change and cultural responses of mountain populations provide clues for us all Critical to understanding mountain adaptations is our comprehension of human

decision making and how people view short and long term outcomes      *Human Adaptability* Emilio F. Moran, 2018-05-04  
Designed to help students understand the multiple levels at which human populations respond to their surroundings this essential text offers the most complete discussion of environmental physiological behavioral and cultural adaptive strategies available Among the unique features that make Human Adaptability outstanding as both a textbook for students and a reference book for professionals are a complete discussion of the development of ecological anthropology and relevant research methods the use of an ecosystem approach with emphasis on arctic high altitude arid land grassland tropical rain forest and urban environments an extensive and updated bibliography on ecological anthropology and a comprehensive glossary of technical terms Entirely new to the third edition are chapters on urban sustainability and methods of spatial analysis with enhanced emphasis throughout on the role of gender in human adaptability research and on global environmental change as it affects particular ecosystems In addition new sections in each chapter guide students to websites that provide access to relevant material complement the text s coverage of biomes and suggest ways to become active in environmental issues      **Traditional Ecological Knowledge** Robert Earle Johannes, 1989
