## Introduction:

Little else in nature has the destructive force of a full-fledged hurricane. These massively powerful systems can produce sustained winds of 150+ miles per hour with gusts of up to 190 miles per hour, as well as intense bursts of rain and ocean surges that cause extensive flooding. Known as hurricanes in the North Atlantic (where they spin counterclockwise), typhoons in the Philippines, and cyclones in India and Australia (where they spin clockwise), they may have a life span of a few days to many weeks and can cover an area of thousands of square miles. They can be an extreme threat to life and property, and should be respected and feared.

Hurricane season for the North Atlantic runs from June 1 - November 30, each year. You will track the most costly hurricane in US history, Hurricane Katrina (2005).
