Perspectives on the IB Diploma Core Jeff Thompson,Judith Fabian,Mary Hayden,2019-10-15 The Diploma Programme was the first programme to be devised and implemented by the International Baccalaureate over fifty years ago Since its creation the curriculum upon which the programme is based has been continuously developed to take into account the rapidly changing needs of students schools higher education and employment contexts For much of that time the programme has included three essential components that must be undertaken by students who wish to graduate with the Diploma Theory of Knowledge Extended Essay and Creativity Activity Service CAS Taken together over time these have come to be regarded as a core of the Diploma Programme although they were not described as such at the outset This edited collection is intended to provide input into the current review of the IB Diploma Programme It comprises contributions from experienced authors researchers and practitioners who were invited to reflect upon the nature of the core as it exists at present to raise issues in relation to the future development of the core and to share experience in the learning and teaching of the core components across a wide range of schools in both national and international systems of education Questions concerning the concept of the core as a whole developing students as internationally minded thinkers and the challenges of bringing coherence to the core in establishing a holistic approach to the curriculum underpin the individual chapters throughout Contributors Edward Allanson Tom Brodie John Cannings

Meeting, 1994 *The SAGE Handbook of Research in International Education* Mary Hayden, Jeff Thompson, Jack Levy, 2007-01-03 The editors of the SAGE Handbook of Research in International Education have brought together an impressive array of scholars whose cutting edge research addresses the growing field of international education from the experiences of K 12 schools around the world to the field of teacher education This book raises important questions and should be read by a broad audience Kenneth Cushner Executive Director of International Affairs and Professor of Education Kent State University The editors of this admirable handbook have set out to produce a report on international education Their consummate success in doing so gives those of us working in the field a new and invaluable resource The editors may be academics but this is a book largely written by about and for those whose job it is to teach internationally No one working in international education will fail to be provoked challenged or inspired by the compelling arguments advanced within this authoritative volume Peter MacKenzie Principal Hiroshima International School The book is well organized in carefully integrated sections and chapters and the references alone are a valuable bibliographical tool An indispensable work highly recommended for education reference collections and the libraries of individual researchers J B Thomas Emeritus Professor of Educational Studies Loughborough University Interest in the field of international education has never been more intense than at present There are a rapidly increasing number of schools worldwide set up specifically to meet the demands of those parents who through their own professional activities wish to have their sons and daughters educated in schools that offer programmes based on international values Such schools have embraced the promotion of international education as one of their major goals and consequently an increasing number of organisations currently offer curricula that claim to be international in nature Such global movements

have created a parallel increase in the incorporation of forms of international education within national school systems throughout the world. This has resulted in wider forms of collaboration between schools in the public and private sectors nationally and internationally generating a much more substantial base of professional experience in the implementation of schemes for international education than had previously existed. This book analyses the origins, contributions and interpretations of international education. The authors identify approaches to research that will progress our knowledge and understanding of the field and extend and even redraw it on the basis of the research evidence presented. Content includes: A historical overview of the ways in which the term international education has been interpreted; The theoretical interpretation of international education in its current context; International education in practice: exploration of the issues in terms of students, curricula, pedagogies and organising formal institutions; Conceptual challenges for international education in the future. This handbook is an essential resource for those who are involved in the practice and academic study of international education. It will be of particular interest to researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools. This volume is another valuable SAGE contribution to the expanding literature on international education. Not all handbooks are described as essential reading, but this one will be and will become an indispensable work of reference, highly recommended for education libraries, both academic and governmental, and for the bookshelves of individual researchers and all involved in international education. The three editors and their fellow authors can take a collective pride in having given us an excellent volume which very successfully completes a chronological and theoretical journey through the issues, practices and future questions presented by international research and practice in international education. *Journal of Research in International Education* *The Garden in the Machine* Scott MacDonald, 2001-12-18. *The Garden in the Machine* explores the evocations of place and particularly American place that have become so central to the representational and narrative strategies of alternative and mainstream film and video. Scott MacDonald contextualizes his discussion with a wide ranging and deeply informed analysis of the depiction of place in nineteenth and twentieth century literature, painting and photography. Accessible and engaging, this book examines the manner in which these films represent nature and landscape in particular and location in general. It offers us both new readings of the films under consideration and an expanded sense of modern film history. Among the many antecedents to the films and videos discussed here are Thomas Cole's landscape painting, Thoreau's Walden, Olmsted and Vaux's Central Park and Eadweard Muybridge's panoramic photographs of San Francisco. MacDonald analyzes the work of many accomplished avant-garde filmmakers: Kenneth Anger, Bruce Baillie, James Benning, Stan Brakhage, Nathaniel Dorsky, Hollis Frampton, Ernie Gehr, Larry Gottheim, Robert Huot, Peter Hutton, Marjorie Keller, Rose Lowder, Marie Menken, J. J. Murphy, Andrew Noren, Pat O'Neill, Leighton Pierce, Carolee Schneemann and Chick Strand. He also examines a variety of recent commercial feature films as well as independent experiments in documentary and such contributions to independent

video history as George Kuchar's Weather Diaries and Ellen Spiro's Roam Sweet Home MacDonald reveals the spiritual underpinnings of these works and shows how issues of race ethnicity gender and class are conveyed as filmmakers attempt to discover forms of Edenic serenity within the Machine of modern society Both personal and scholarly The Garden in the Machine will be an invaluable resource for those interested in investigating and experiencing a broader spectrum of cinema in their teaching in their research and in their lives
