Vránová, 2023-05-23 As Languages for Specific Purposes have always been defined as student oriented the rationale behind this volume is to use the rather neglected niche of the other necessary agent of language instruction and thus focus on the LSP practitioner This turn towards the instructor has been motivated by the fact that a great number of LSP practitioners enter their jobs without previous expertise They lack LSP education or they may not even have a background in applied linguistics This motivation has proven valid as many of the volume's contributors have faced this particular situation in their professional lives For insights into the LSP field and guidelines on the best practices they must rely on their colleagues who offer to share their experience through workshops conferences or papers which is what this volume provides The primary goal of this volume is to present considerations of what challenges LSP practitioners face and should be prepared for in their jobs and to provide practice tested methodological guidelines on such demanding teaching techniques as blended and flipped learning or tandem learning All papers have been written by LSP practitioners and researchers in higher education Thus this volume provides both guidance and self reflection In other words it is written by experienced LSP practitioners for aspiring LSP practitioners about how they see themselves and what effort they make to meet the challenges of their jobs As proof that LSP practice is a global challenge papers have been collected from many European countries the USA Uruguay Even though most papers are naturally concerned with English being the lingua franca of today the collection also features guidelines for teaching Spanish French and Dutch for specific purposes Moreover the target disciplines these languages are taught for encompass business engineering sociology or medicine thus supporting the assumption of the universal character of problems LSP practitioners deal with

Support for Home Education Great Britain: Parliament: House of Commons: Education Committee, 2012-12-18 This report supports the right of parents to educate their children at home and accept that home educating families should bear the costs of that provision It is not reasonable however that it should be so difficult to access an exam centre nor that families should pay exam costs on top of everything else Home educators and local authorities LAs have since the Badman Review and its aftermath in 2009 made real efforts to engage and to ensure more constructive relationships and better support but there is clearly some way to go In particular the Committee notes the postcode lottery element of current provision for home educators with different LAs offering starkly different services and patterns of support It calls on the Department for Education to conduct an audit review the home education guidance given to LAs and to support pilots for local offers of support being published The Committee is also concerned that provisions for home educated young people with SEN are not being fully met
