Tac-Tac Pedro Mendonça, 2016-09-14 In the football world Pep Guardiola is considered as the coach who comes up with the best ideas for his teams to play an aesthetically quality attacking game with great results However having studied his training methods both at Barcelona and Bayern Munich I am convinced

the structured approach his technical staff uses to implement his ideas doesn't really reflect his genius. In my opinion, Tactical Periodization is the appropriate methodology to implement Pep's ideas, which is my intention to demonstrate throughout this book. As you may recall, the principles of Tactical Periodization were detailed in my previous book, *Tactical Periodization: A Practical Application for the Game Model of the FC Bayern Munich of Jupp Heynckes* (2011, 2013), which are needed to understand the advanced training thoughts herein discussed.

Mastering the Premier League (Lee Scott, 2020-05) Discover the secrets of the game model developed by Pep Guardiola that sets Manchester City apart from the rest. When Guardiola joined Manchester City in 2016, there were doubts that he could replicate his successful model in the English game. But after a single season of acclimatization, we saw those doubts shattered as City won the Premier League in 2017/18 with a record 100 points. Beyond the trophies and the records, however, lies a yet more intriguing story of how Guardiola adapted and perfected the tactical principles that had made him so successful at Barcelona and Bayern Munich, who played the key roles on the field enabling Manchester City's successes of 2017/19 and why the other Premier League sides were unable to stop the City juggernaut sweeping aside all in its path.

Pep Guardiola's Positional Grid Marcus DiBernardo, 2018-01-30 The positional grid is like a cognitive road map for players when in possession Depending on where the ball is located players are responsible to fill a specific location in the positional grid The end result is that a team shape or structure will develop in possession resulting in a positional soccer style of play However the game of soccer has unlimited ever changing situations and variables so there will always be freedom within the provided positional structure to make adaptations The positional soccer grid divides the training pitch into 20 sections basically five vertical rows and four cross field sections The widest channels are referred to as the low option areas because there are limited passing opportunities that can be made from out wide The widest areas are utilized often to draw the defense out moving them from side to side to open up space in between the defenders or on the far side The next space that borders the wide channel is called a half space The half space is a dangerous area because penetrating balls and shots on goal can be taken from this position Guardiola often liked his most dangerous players like Robben or Messi to receive the ball in the half spaces How many goals have we seen those two players create by cutting inside and shooting to the far post The next space is the large space on top of the 18 yard box this space is considered the most dangerous area on the soccer field This large box is so dangerous because more goals are created from this area than anywhere else However quick 1 touch play is critical in this area to be effective with the largest concentration of defenders located in this space Of course players like Messi are invaluable in areas like this as they can make the impossible happen changing the game The positional grid offers a structure and provides cues for players letting them know to adjust their position depending in which zone the ball is in they must know when to fill an empty zone when it has been vacated or to move into a zone to create superiority of numbers A general rule of thumb is that no more than three players will be in a horizontal line and not more than two in a vertical line this helps give the player on the ball two three passing options The entire game can be taught using the grid from build up play to the attacking third When using the grid to teach positional soccer there are many ways to utilize it One way is to set up trainings that require players to operate inside the positional grid adhering to specific conditions but still allowing a degree tactical freedom while encouraging problem solving An example of this would be

requiring five shorter passes on one side of the field before a long pass can be made switching the field to the far wide player. The next type of training can use the grid as more of a specific road map that must be strictly adhered to. An example of this would be working on playing the ball out of the back. Each player will be assigned a specific part of the grid to be in as a standard way of operating out of the back is established. The other beneficial aspect of using the positional grid is that it organizes space on the field in a realistic way for players. When players train tactics in specific game realistic spaces their soccer awareness, tactical sense, and soccer IQ benefit. Training in the positional grid helps players better judge distance, space, and time in relationship to carrying out the desired tactics. I recommend training with the grid and then removing the grid at the end so that spatial relationship is further reinforced.
