The Crisis of Calvinism in Revolutionary England, 1640-1660 Rev. Andrew Ollerton, Andrew Ollerton, 2023 This book investigates a puzzling and neglected phenomenon the rise of English Arminianism during the decade of puritan rule Throughout the 1650s numerous publications from scholarly folios to popular pamphlets attacked the doctrinal commitments of Reformed Orthodoxy This anti Calvinist onslaught came from different directions episcopalian royalists Henry Hammond Herbert Thorndike Peter Heylyn radical puritan defenders of the regicide John Goodwin and John Milton and sectarian Quakers and General Baptists Unprecedented rejection of Calvinist soteriology was often coupled with increased engagement with Catholic Lutheran and Remonstrant alternatives As a result sophisticated Arminian publications emerged on a scale that far exceeded the Laudian era Cromwellian England therefore witnessed an episode of religious debate that significantly altered the doctrinal consensus of the Church of England for the remainder of the seventeenth century The book will appeal to historians interested in the contested nature of Anglicanism and theologians interested in Protestant debates regarding sovereignty and free will Part One is a work of religious history which charts the rise of English Arminianism across different ecclesial camps episcopal puritan and sectarian These chapters not only introduce the main protagonists but also highlight a surprising range of distinctly English Arminian formulations Part Two is a work of historical theology which traces the detailed doctrinal formulations of two prominent divines the puritan John Goodwin and the episcopalian Henry Hammond Their Arminian theologies are set in the context of the Western theological tradition and the soteriological debates that followed the Synod of Dort The book therefore integrates historical and theological enquiry to offer a new perspective on the crisis of Calvinism in post Reformation England

Moment Work Moises Kaufman, Barbara Pitts McAdams, 2018-04-17 A detailed guide to the collaborative method developed by the acclaimed creators of The Laramie Project and Gross Indecency destined to become a classic A Vintage Original By Moises Kaufman and

Barbara Pitts McAdams with Leigh Fondakowski Andy Paris Greg Pierotti Kelli Simpkins Jimmy Maize and Scott Barrow For more than two decades the members of Tectonic Theater Project have been rigorously experimenting with the process of theatrical creation Here they set forth a detailed manual of their devising method and a thorough chronicle of how they wrote some of their best known works This book is for all theater artists actors writers designers and directors who wish to create work that embraces the unbridled potential of the stage *Architecture as a Performing Art* Marcia Feuerstein, Gray Read, 2016-04-15 How do buildings act with people and among people in the performances of life This collection of essays reveals a deep alliance between architecture and the performing arts uncovering its roots in ancient stories and tracing a continuous tradition of thought that emerges in contemporary practice With fresh insight the authors ask how buildings perform with people as partners rather than how they look as formal compositions They focus on actions the door that offers the possibility of making a dramatic entrance the window that frames a scene and the city street that is transformed in carnival The essays also consider the design process as a performance improvised among many players and offer examples of recent practice that integrates theater and dance This collection advances architectural theory history and criticism by proposing the lens of performance as a way to engage the multiple roles that buildings can play without reducing them to functional categories By casting architecture as spatial action rather than as static form these essays open a promising avenue for future investigation For architects the essays propose integrating performance into design through playful explorations that can reveal intense relationships between people and place and among people in place Such practices develop an architectural imagination that intuitively asks How might people play out their stories in this place and How might this place spark new stories Questions such as these reside in the heart of all of the essays presented here Together they open a position in the intersection between everyday life and staged performance to rethink the role of architectural design **Eugene O'Neill and the Reinvention of Theatre Aesthetics** Thierry Dubost, 2019-07-01 The plays of Eugene O'Neill testify to his continued search for new dramatic strategies The author explores the Nobel Prize winner's attempts at creating a new Modern play He shows how moving away from melodrama or the problem play O'Neill revisited the classical frames of drama and reinvented theater aesthetics by resorting to masks the chorus acoustics silence or immobility for the creation of his dramatic works *A New Physiognomy of Jewish Thinking* Aubrey L. Glazer, 2011-03-24 *A New Physiognomy of Jewish Thinking* is a search for authenticity that combines critical thinking with a yearning for heartfelt poetics A physiognomy of thinking addresses the figure of a life lived where theory and praxis are unified This study explores how the critical essays on music of German Jewish thinker Theodor Wiesengrund Adorno 1903-1969 necessarily accompany the downfall of metaphysics By scrutinizing a critical juncture in modern intellectual history marked in 1931 by Adorno's founding of the Frankfurt Institute for Social Research neglected applications of Critical Theory to Jewish Thought become possible This study proffers a constructive justification of a critical standpoint reconstructively shown how such ideals are

seen under the genealogical proviso of recognizing their original meaning Recognition of A New Physiognomy of Jewish Thinking redresses neglected applications of Negative Dialectics the poetics of God the metaphysics of musical thinking reification in Zionism the transpoetics of Physics and Metaphysics as well as correlating Aesthetic Theory to Jewish Law halakhah Systemics of Incompleteness and Quasi-Systems Gianfranco Minati, Mario R. Abram, Eliano Pessa, 2019-06-20 This book contains the proceedings of the Seventh National Conference of the Italian Systems Society The title Systemics of Incompleteness and Quasi Systems aims to underline the need for Systemics and Systems Science to deal with the concepts of incompleteness and quasiness Classical models of Systemics are intended to represent comprehensive aspects of phenomena and processes They consider the phenomena in their temporal and spatial completeness In these cases possible incompleteness in the modelling is assumed to have a provisional or practical nature which is still under study and because there is no theoretical reason why the modelling cannot be complete In principle this is a matter of non complex phenomena to be considered using the concepts of the First Systemics When dealing with emergence there are phenomena which must be modelled by systems having multiple models depending on the aspects being taken into consideration Here incompleteness in the modelling is intrinsic theoretically relating changes in properties structures and status of system Rather than consider the same system parametrically changing over time we consider sequences of systems coherently We consider contexts and processes for which modelling is incomplete being related to only some properties as well as those for which such modelling is theoretically incomplete as in the case of processes of emergence and for approaches considered by the Second Systemics In this regard we consider here the generic concept of quasi explicating such incompleteness The concept of quasi is used in various disciplines including quasi crystals quasi particles quasi electric fields and quasi periodicity In general the concept of quasiness for systems concerns their continuous structural changes which are always meta stable waiting for events to collapse over other configurations and possible forms of stability whose equivalence depends on the type of phenomenon under study Interest in the concept of quasiness is not related to its meaning of rough approximation but because it indicates an incompleteness which is structurally sufficient to accommodate processes of emergence and sustain coherence or generate new equivalent or non equivalent levels The conference was devoted to identifying discussing and understanding possible interrelationships of theoretical disciplinary improvements recognised as having prospective fundamental roles for a new Quasi Systemics The latter should be able to deal with problems related to complexity in more general and realistic ways when a system is not always a system and not always the same system In this context the inter disciplinarity should consist for instance of a constructionist incomplete non ideological multiple contradiction tolerant Systemics always in progress and in its turn emergent **Body Voice Imagination** David G. Zinder, 2002 The beginning actor will find here the tools to prepare for a life on stage and the experienced performer will appreciate techniques that will turn good performances into great ones La MaMa Experimental Theatre - A Lasting

Bridge Between Cultures Monica Cristini, 2023-11-10 This book focuses on the role of La MaMa Experimental Theatre within Avant garde theater during the 1960s and 1970s This study investigates the involvement of the Off Off Broadway circuit in the Avant garde experimentations both in the United States New York specifically and in Europe This exploration shows the two way influence between Europe and the United States testified by documents gathered in years of archival research In this relevant artistic exchange La MaMa and Ellen Stewart as its founder and artistic director emerges as a key element La MaMa s companies brought to Europe the American culture and the New York underground culture while their members learnt European training techniques by attending workshops or taking part in the research of Eugenio Barba Jerzy Grotowski and Peter Brook and brought their principles back to the United States This book goes through a chronological path that presents some key cases of collaboration between the above mentioned European masters and some La MaMa s artists and companies Tom O Horgan and La MaMa Repertory Troupe the Open Theatre Andrei Serban and The Great Jones Repertory Company La MaMa Plexus This book will be of great interest to students and scholars in theater and performance studies

Religion und Gefühl Lars Charbonnier, Matthias Mader, Birgit Weyel, 2013-09-18 Emotionality booms Presently feelings and emotions play a major role in many scientific fields The same is true for contemporary endeavours to discern and describe religious phenomena within religious studies Theology has however only little to offer to an interdisciplinary theory of emotion There are few classic theological approaches to the topic of religious feelings because past and contemporary theological reflection all too often restricts itself to cognitive concepts of religion Religion is mostly seen as an individual s rational way of meaning making in order to find guidelines to his or her actions Thereby important aspects of religious practise are ignored This book documents different empirical and non empirical attempts to theorize

emotion It is asked whether there are any emotions and feelings that are in themselves religious If this is the case in what way do they differ from non religious emotions and feelings What is the relation between a religious idea and the emotion that is connected to it Are ideas antecedent or do feelings come first Which ideas work as triggers of which particular religious affections
