Physics Briefs ,1993 *Mathematical and Computational Modelling of Covid-19 Transmission* Mandeep Mittal, Nita H. Shah, 2023-12-07 Infectious diseases are leading threats and are of highest risk to the human population globally Over the last two years we saw the transmission of Covid 19 Millions of people died or were forced to live with a disability Mathematical models are effective tools that enable analysis of relevant information simulate the related process and

evaluate beneficial results They can help to make rational decisions to lead toward a healthy society Formulation of mathematical models for a pollution free environment is also very important for society To determine the system which can be modelled we need to formulate the basic context of the model underlying some necessary assumptions This describes our beliefs in terms of the mathematical language of how the world functions This book addresses issues during the Covid phase and post Covid phase It analyzes transmission impact of coinfections and vaccination as a control or to decrease the intensity of infection It also talks about the violence and unemployment problems occurring during the post Covid period This book will help societal stakeholders to resume normality slowly and steadily **Mathematical Reviews** ,2005 **Relevance of**

Duties in the Contemporary World Raman Mittal,Kshitij Kumar Singh,2023-01-01 This book reflects on the significance of duties in creating an egalitarian society by collating and contextualizing the relevant literature It particularly focuses on an appreciation of Gandhi s views on duty to showcase how they remain pertinent to create a cohesive responsible and value based society in the present right dominated world A viable solution to the current real world problems could be found in exploring the philosophy on duties and the book provides relevant literature in this regard It undertakes jurisprudential analysis of duty in a rights dominated world identifying the gaps in realising the potential of duty to address the critical issues of the present times It argues that enforcement of rights depends heavily on the observance of duties and proposes coherence in right duty relationship Gandhian thought on duty recognises duty as a precursor to rights and emphasises that the observance of duties guarantees the enforcement of rights The relevance of duties and Gandhian thoughts on the same is not restricted to India but transcends borders with profound appeal Gandhian thoughts have become even more relevant in the current times to examine the situation of COVID 19 pandemic racial discrimination BLM environmental crises digital divide health care and medical care crises refugee and migrant labour problems and it can offer promising solutions based on the nuances of social solidarity self realisation of duties responsibilities local governance compassion and humanity

Indian Books in Print ,2003 *Characterization of Nanocomposites* Frank Abdi,Mohit Garg,2017-03-31 These days advanced multiscale hybrid materials are being produced in the industry studied by universities and used in several applications Unlike for macromaterials it is difficult to obtain the physical mechanical electrical and thermal properties of nanomaterials because of the scale Designers however must have knowledge of these properties to perform any finite element analysis or durability and damage tolerance analysis This is the book that brings this knowledge within easy reach What makes the book unique is the fact that its approach that combines multiscale multiphysics and statistical analysis with multiscale progressive failure analysis The combination gives a very powerful tool for minimizing tests improving accuracy and understanding the effect of the statistical nature of materials in addition to the mechanics of advanced multiscale materials all the way to failure The book focuses on obtaining valid mechanical properties of nanocomposite materials by accurate prediction and observed physical tests as well as by evaluation of test anomalies of advanced multiscale

nanocomposites containing nanoparticles of different shapes such as chopped fiber spherical and platelet in polymeric ceramic and metallic materials The prediction capability covers delamination fracture toughness impact resistance conductivity and fire resistance of nanocomposites The methodology employs a high fidelity procedure backed with comparison of predictions with test data for various types of static fatigue dynamic and crack growth problems Using the proposed approach a good correlation between the simulation and experimental data is established Indian Science Abstracts ,1996 **The Stanford Alumni Directory** ,2000 **International Books in Print** ,1991 Science Citation Index ,1992 Vols for 1964 have guides and journal lists Whitaker's Books in Print ,1998 *Books in Print* ,1977 *Combined Membership List* American Mathematical Society,Merican Mathematical Society Staff,1995 A comprehensive directory of the membership of the American Mathematical Society the American Association of the Two Year Colleges the Mathematical Association of America and the Society for Industrial and Applied Mathematics **INIS Atomindeks** ,1988
