Pigs For The Ancestors Ritual In The Ecology Of A New Guinea People 2nd Edition By Roy A Rappaport 2000 Paperback:

Pigs for the Ancestors Roy A. Rappaport, 2000-02-07 This influential work is the most important and widely cited book ever published in ecological anthropology. It is a classic case study of human ecology in a tribal society, the role of culture especially ritual in local and regional resource management, negative feedback and the application of systems theory to an anthropological population. It is considered a major work of theory yet it is also empirically grounded in Rappaport's meticulous collection of quantitative and qualitative data on such material matters as diet and energy expenditure as well as such mental/cognitive ideational domains as myth and folk taxonomies. Rappaport's tour de force is a recognized classic because it contributes in so many ways to anthropological theory, ethnographic methodology, ecological anthropology and the anthropology of religion. This enlarged edition offers a carefully reasoned, empirically focused reassessment of Rappaport's original study in the context of ongoing theoretical and methodological problems.

The World Until Yesterday Jared Diamond, 2013-01-10 From the author of No. 1 international bestseller *Collapse*, a mesmerizing portrait of the human past that offers profound lessons for how we can live today. Visionary prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers *Guns, Germs, and Steel* and *Collapse*. Now he returns with another epic and groundbreaking journey into our rapidly receding past. In *The World Until Yesterday*, Diamond reveals how traditional societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history until virtually yesterday in evolutionary terms and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems from childrearing to conflict resolution to health and discovers we have much to learn from traditional ways of life. He unearths remarkable findings from the reason why modern afflictions like diabetes, obesity, and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of multilingualism. Panoramic in scope and thrillingly original, *The World Until Yesterday* provides an enthralling first-hand picture of the human past that also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy bestseller *Guns, Germs, and Steel*, which was named one of TIME's best non-fiction books of all time, and *Collapse*, a No. 1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology, and history among others.

Nature and Bureaucracy David Jenkins, 2022-09-08 This book questions how bureaucracies conceive of and consequently interact with nature and suggests that our managed public landscapes are neither entirely managed nor entirely wild and offers several warnings about bureaucracies and bureaucratic mentality. One prominent challenge facing scientists, policymakers, environmental activists, and environmentally concerned citizens is to recognize that human influence in the natural world is pervasive and

has a long history How we act or choose not to act today will continue to determine the future of the natural world Western style management of nature mediated by economic rationality and state bureaucracies may not be the best strategy to maintain environmental integrity The question is what kinds of human influence conceived of in the widest possible sense will produce ideal environments for future generations The related question is who gets to choose The author approaches the problem of analyzing the mutual influence of human and natural systems from two perspectives as an objective scholar investigating bureaucracies and natural systems from the outside and over the last decade as an inside practitioner working in various roles in federal land management agencies developing policies and regulations involved in the control of natural systems This book will be of great interest to students and scholars of natural resource management policy and politics and professionals working in environmental management roles as well as policymakers involved in public policy and administration

From Silo to Spoon Paul B. Thompson, 2023-11-02 Paul B Thompson addresses ethical issues in food and local diets food labeling agricultural pollutants and sustainability in five new essays that pick up where his book *From Field to Fork* left off Thompson places his examination of the issues into the context of contemporary pragmatism agrarianism the philosophy of race and the relationship between persuasive speech social control and open ended ethical inquiry

River Life and the Upspring of Nature Naveeda Khan, 2022-12-19 In *River Life and the Upspring of Nature* Naveeda Khan examines the relationship between nature and culture through the study of the everyday existence of chauras the people who live on the chars sandbars within the Jamuna River in Bangladesh Nature is a primary force at play within this existence as chauras live itinerantly and in flux with the ever changing river flows where land is here today and gone tomorrow the quality of life itself is intertwined with this mutability Given this centrality of nature to chaura life Khan contends that we must think of nature not simply as the physical landscape and the plants and animals that live within it but as that which exists within the social and at the level of cognition the unconscious intuition memory embodiment and symbolization By showing how the alluvial flood plains configure chaura life Khan shows how nature can both give rise to and inhabit social political and spiritual forms of life

Evolutionism In Cultural Anthropology Robert L. Carneiro, 2018-02-23 Examines the history of evolutionism in cultural anthropology beginning with its roots in the 19th century through the half century of anti evolutionism to its reemergence in the 1950s and the current perspectives on it today No other book covers the subject so fully or over such a long period of time *Evolutionism and Cultural Anthropology* traces the interaction of evolutionary thought and anthropological theory from Herbert Spencer to the twenty first century It is a focused examination of how the idea of evolution has continued to provide anthropology with a master principle around which a vast body of data can be organized and synthesized Erudite and readable and quoting extensively from early theorists such as Edward Tylor Lewis Henry Morgan John McLennan Henry Maine and James Frazer so that the reader might judge them on the basis of their own words *Evolutionism and Cultural Anthropology* is useful reading for courses in anthropological theory and the history of
