A New Theory of Market and Capitalism Anatoliy Zhelezniak, 2021-11-12 This book presents a new

theory of market and capitalism detailing its key moments and general logic. It is based on the distinction between two market types: the simple commodity market and the capitalist one. In contrast to what is usually uncritically accepted, disequilibrium and imperfect competition are admitted here to be a functional norm of the capitalist market. The book also shows that equilibrium and perfect competition are admitted to be a functional anomaly with crises considered as the result of such an anomaly. It details the general principles and concrete measures of crisis-proof policies and behavior.

Each of the text's ten parts opens with a framing essay by the editors that provides an overview of the central themes and issues as well as sometimes competing points of view. The fourth edition of this comprehensive volume includes both new and classic readings as well as two new sections on the international NGO sector and theories about intersectoral relations. *The Nature of the Nonprofit Sector* Fourth Edition is therefore an impressively up-to-date reader designed to provide students of nonprofit and public management with a thorough overview of this growing field. **The Microeconomics of Market**
