Ökonomik des Handels mit Umweltrechten Barbara Lueg, 2010. Die Menge an Treibhausgasemissionen ist in den letzten 150 Jahren stark gestiegen, wobei deutlich ist, dass die anthropogen verursachten Einflüsse eine wichtige Rolle spielen. Eine Annäherung an die Umwelt aus wirtschaftswissenschaftlicher Sicht zeigt u.a., dass durch das Auseinanderfallen der privaten und sozialen Kosten bei negativen externen Effekten umweltbelastende Güter in zu großem Maße eingesetzt werden. Es kommt auf diese Weise zu einer Fehlallokation am Markt. Aus theoretischer Sicht stehen mehrere Instrumente zur Verfügung, um externe Effekte zu internalisieren. In der Arbeit werden sieben dieser Instrumente ausgewählt und hinsichtlich ihrer ökologischen Effektivität und ökonomischen Effizienz überprüft. Das Instrument Emissionshandel erfüllt beide Kriterien. Diese Arbeit entwickelt ferner eine optimale Ausgestaltung des europäischen Emissionshandelssystems. Dabei werden neben rein theoretischen Überlegungen auch die politischen Seiten des Umweltschutzes beachtet.

Ökonomische Theorie und christlicher Glaube Andrew Britton, Peter H. Sedgwick, 2008.

knowledge transfer multilingual and cross cultural exchange *The Airline Profit Cycle* Eva-Maria Cronrath, 2017-07-06 The air transport industry has high economic impact it supports more than 60 million jobs worldwide Since the early years of commercial air travel passenger numbers have grown tremendously However for decades airlines financial results have been swinging between profits and losses The airline industry's aggregate net average profit between 1970 and 2010 was close to zero which implies bankruptcies and layoffs in downturns The profit cycle's amplitude has been rising over time which means that problems have become increasingly severe and also shows that the industry may not have learned from the past More stable financial results could not only facilitate airline management decisions and improve investors confidence but also preserve employment This book offers a thorough understanding of the airline profit cycle's causes and drivers and it presents measures to achieve a higher and more stable profitability level This is the first in depth examination of the airline profit cycle The airline industry is modelled as a complex dynamic system which is used for quantitative simulations of what

if scenarios These experiments reveal that the general economic environment such as GDP or fuel price developments influence the airline industry's profitability pattern as well as certain regulations or aircraft manufacturers policies Yet despite all circumstances simulations show that airlines own management decisions are sufficient to generate higher and more stable profits in the industry This book is useful for aviation industry decision makers investors policy makers and researchers because it explains why the airline industry earns or loses money This knowledge will advance forecasting and market intelligence Furthermore the book offers practitioners different suggestions to sustainably improve the airline industry's profitability The book is also recommended as a case study for system analysis as well as industry cyclicity at graduate or postgraduate level for courses such as engineering economics or management

Ethics and Images of Pain Asbjørn Grønstad, Henrik Gustafsson, 2012-04-27 Few phenomena are as formative of our experience of the visual world as displays of suffering But what does it mean to have an ethical experience of disturbing or traumatizing images What kind of ethical proposition does an image of pain mobilize How may the spectator learn from and make use of the painful image as a source of ethical reflection Engaging with a wide range of visual media from painting theatre and sculpture to photography film and video this interdisciplinary collection of essays by leading and emerging scholars of visual culture offers a reappraisal of the increasingly complex relationship between images of pain and the ethics of viewing Ethics and Images of Pain reconsiders the persistent and ever pertinent nexus of aesthetics and ethics the role of painful images as generators of unpredictable forms of affect the moral transformation of spectatorship the ambivalence of the witness and the representation of affliction as a fundamental form of our shared scopic experience The instructive and illuminating essays in the collection introduce a phenomenological context in which to make sense of our current ecology of excruciating images one that accentuates notions of responsibility empathy and imagination

Contributors trace the images of pain across a miscellany of case studies and amongst the topics addressed are the work of artists as disparate as Doris Salcedo Anselm Kiefer and Bendik Riis photographs from Abu Ghraib and Rwanda Hollywood war films and animated documentaries performances of self immolations and incidents of police brutality captured on mobile phones

book brings together perspectives of economists and lawyers who have not rallied to one or the other popular call for more regulation as a panacea for the prevention of future global financial crises calls which have all but drowned out more nuanced scientific debates Instead their analysis of aspects of remedial regulatory policy prescriptions already made or proposed demonstrates that carefully designed soft law can be deployed as a valuable method or tool of mediation between the unrestrained autonomy of dysfunctional markets and overzealously crafted hard law
