Crone, Stefan Lessmann, 2009-11-10 Over the course of the

last twenty years research in data mining has seen a substantial increase in interest attracting original contributions from various disciplines including computer science statistics operations research and information systems Data mining supports a wide range of applications from medical decision making bioinformatics web usage mining and text and image recognition to prominent business applications in corporate planning direct marketing and credit scoring Research in information systems equally reflects this inter and multidisciplinary approach thereby advocating a series of papers at the intersection of data mining and information systems research This special issue of Annals of Information Systems contains original papers and substantial extensions of selected papers from the 2007 and 2008 International Conference on Data Mining DMIN 07 and

DMIN 08 Las Vegas NV that have been rigorously peer reviewed The issue brings together topics on both information systems and data mining and aims to give the reader a current snapshot of the contemporary research and state of the art practice in data mining *Modern Psychometrics with R* Patrick Mair,2018-09-20 This textbook describes the broadening methodology spectrum of psychological measurement in order to meet the statistical needs of a modern psychologist The way statistics is used and maybe even perceived in psychology has drastically changed over the last few years computationally as well as methodologically R has taken the field of psychology by storm to the point that it can now safely be considered the lingua franca for statistical data analysis in psychology The goal of this book is to give the reader a starting point when analyzing data using a particular method including advanced versions and to hopefully motivate him or her to delve deeper into additional literature on the method Beginning with one of the oldest psychometric model formulations the true score model Mair devotes the early chapters to exploring confirmatory factor analysis modern test theory and a sequence of multivariate exploratory method Subsequent chapters present special techniques useful for modern psychological applications including correlation networks sophisticated parametric clustering techniques longitudinal measurements on a single participant and functional magnetic resonance imaging fMRI data In addition to using real life data sets to demonstrate each method the book also reports each method in three parts first describing when and why to apply it then how to compute the method in R and finally how to present visualize and interpret the results Requiring a basic knowledge of statistical methods and R software but written in a casual tone this text is ideal for graduate students in psychology Relevant courses include methods of scaling latent variable modeling psychometrics for graduate students in Psychology and multivariate methods in the social sciences **Research Methodologies, Innovations and Philosophies in Software**

Artificial Intelligence in Education Myint Swe Khine, 2024-10-30 This comprehensive volume explores the possibilities, challenges, and ethical considerations of Artificial Intelligence (AI) in education through a machine-generated literature review that examines emerging research trends and findings. Each chapter presents summaries of pre-defined topics and includes a human-written introduction by the book editor. It covers critical areas such as educational data mining, learning analytics, personalised learning, adaptive assessment, intelligent tutoring systems, as well as the ethical challenges of AI in education. This volume provides valuable insights for educators, researchers, policymakers, and students seeking to understand the transformative potential of AI in education. It serves as a reference point for navigating the evolving landscape of AI-assisted learning and offers a glimpse into the future of education in an AI-driven world. The auto summaries were generated by a recursive clustering algorithm using the Dimensions Auto Summariser from Digital Science. The editor of this book selected the SN content to be auto summarised and decided the order of appearance. Please note that these are extractive auto summaries consisting of original sentences but are not representative of the original paper as we do not show the full length of the publication. Please note that only published SN content is represented here and that machine-generated books are still at an experimental stage.
