Climate Change Governance in Chinese Cities Qianqing Mai, Maria Francesch-Huidobro, 2014-11-27 In the last thirty years China has experienced rapid economic development and urbanisation which has resulted in high levels of environmental degradation and has put considerable pressure on the country's infrastructure and natural resources As China commits to considerably lower the carbon intensity of its economy this volume analyses and explains the governance of climate change mitigation responses in major Chinese cities The book focuses specifically on two highly carbon intensive sectors buildings and transport in Guangzhou Shenzhen and Hong Kong to explore how collaborative municipal networks function in practice in Chinese cities The authors find that effective coordination relies on the political will of local administrative elites the political significance attached to climate change issues the legitimate authority granted to the coordinating agency and human and financial capitals Collaboration is hampered by limited span of network engagement inadequate authority of the primary network participants insufficient input and output legitimacy of the sectoral innovations and missing linkages across functionally segregated sectors The book concludes that the enhanced collaboration and coordination between networks that has emerged in the process of low carbon transitions is transforming the Chinese environmental state into a more pluralistic inclusive and legitimate one This book will be of interest to researchers and practitioners across disciplines including Chinese studies environmental politics and policy urban studies and planning and geography

International Environmental Law and Policy in Africa B. Chaytor, K.R. Gray, 2003-06-30 C O OKID11 I welcome the opportunity to prepare a Foreword to the book on Environmental Policy and Law in Africa edited by Kevin R Gray and Beatrice Chaytor It is a pleasure to do that because the book is a contribution to the cause of capacity building for development and implementation of environmental law in Africa a goal towards which I have had an undivided focus over the last two decades There is still some belief in and outside Africa that for developing countries in general and Africa in particular development and implementation of environmental law is not a priority This belief prevails strongly in many quarters of the industrialised countries In fact the view is held either out of blatant ignorance or by some renegade industrialists who fail to appreciate Michael Royston's 1979 thesis that Pollution Prevention Pays 2 That group for obvious reasons must have their correspondent counterparts in Africa to provide hope that industries rejected as derelict in the West or inoperable due to rigorous environmental regulation can find homes to which they can escape and dump their polluting industries

**Crime and Regulation** Fiona Haines, 2017-11-30 This volume brings together key articles in the burgeoning field of regulation The collection is interdisciplinary in keeping with study of regulation itself yet the book arranges and explores these articles to make the bewildering array of issues and concepts that comprise the study of regulation comprehensible to a criminological audience It will be of interest to all scholars and students of criminology and criminal justice as well as those concerned with reducing the crimes and harms of the powerful

### **The Economics of Sustainable Development**

Surender Kumar,Shunsuke Managi,2009-06-10 This book highlights methodological approaches for the economics of sustainable development and brings together recent empirical work done in India especially by Dr Surender Kumar and Dr Shunsuke Managi Various chapters in this book use

Indian data to show the very wide applicability of methodologies in the theory of production for dealing with many empirical issues of environmentally sustainable development in a developing country I congratulate the authors for the time and effort devoted to compiling this very useful reference on the subject and the publishers for publishing this volume The methodologies of cost functions distance functions and production functions have been used in many recent studies and in the studies reported in this book for environmental valuation Environmental valuation is required for designing policy instruments like pollution taxes for sustainable development and for measuring green GDP The UN methodology of integrated environmental and economic accounting provides ways of measuring the cost of maintaining environmental resources at sustainable levels or the maintenance cost for estimating green GDP Some of the chapters in this book show that the methodology of distance functions could be used for estimating the cost of environmentally sustainable development
