Patient Safety in Developing Countries Yaser Al-Worafi,2023-10-05 Understanding the various aspects of patient safety education practice and research in developing countries is vital in preparing a plan to overcome the challenges of improving patient safety This unique volume discusses patient safety in developing countries and the achievements and challenges faced in those places when trying to improve patient safety education and practice This book includes a compilation of over 100 case studies surrounding patient safety in all aspects of health care Both real and simulated scenarios are provided to help medical students and professionals apply their knowledge to solve the cases and prepare for real practice Features Describes the achievements and challenges of patient safety in developing countries Includes real and simulated case studies and key answers on patient safety issues Prepares medical students and practitioners for real life situations Diverse audience including those in medication to safety testing patient education dispensing changes and the design of health systems Aids medical students and practitioners to improve their skills to solve cases Handbook of Research on Updating and Innovating Health Professions Education: Post-Pandemic Perspectives Ford, Channing R.,Garza, Kimberly B.,2021-10-08 The outbreak of the Coronavirus in early 2020 resulted in unprecedented changes to health professions education The pervasive stay at home orders resulted in faculty who were trained for preparing the next generation of health professionals in a traditional learning environment throwing out their lesson plans and starting anew New approaches to teaching and learning were created quickly and without the typical extensive planning which introduced

several challenges. However, lessons learned from these approaches have also resulted in increased technology adoption, innovative assessment strategies, and increased creativity in the learning environment. The Handbook of Research on Updating and Innovating Health Professions Education: Post-Pandemic Perspectives explores the various teaching and learning strategies utilized during the pandemic and the innovative approaches implemented to evaluate student learning outcomes and best practices in non-traditional academic situations and environments. The chapters focus specifically on lessons learned and best practices in health professions education and the innovative and exciting changes that occurred, particularly with the adoption and implementation of technology. It provides resources and strategies that can be implemented into the current educational environments and into the future. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, medical trainers, medical professionals, researchers, academicians, and students interested in curriculum, course design, development of policies and procedures within academic programs, and the identification of best practices in health professions education.
