Chapter 02: Cultural Competence: Cultural Care

Answer Key - Answers to Study Guide Questions in Student Lab Manual

1. Under the provisions of Title VI of the Civil Rights Act of 1964, when people with Limited English Proficiency (LEP) seek health care in health care settings such as hospitals, nursing homes, clinics, day care centers, or mental health centers, services cannot be denied to them. There are many forms of illegal discrimination based on race, color, or national origin that frequently limit the opportunities of people to gain equal access to health care services. It is said that language barriers have a deleterious effect on health care, and patients are less likely to have a usual source of health care, as well as an increased risk of nonadherence to medication regimens (pp. 12-13). If faculty wants to dig a bit deeper on Title VI, here is some more information: An agency that is the recipient of federal financial assistance may not, based on race, color, or national origin:
 - Deny services, financial aid or other benefits provided as a part of health or human service programs.
 - Provide a different service, financial aid or other benefit, or provide them in a different manner from those provided to others under the program.
 - Segregate or separately treat individuals in any matter related to the receipt of any service, financial aid or other benefit. This refers to people with Limited English Proficiency.
2. One response to the government mandates for cultural competency is the development of Cultural Care Nursing, a concept that describes professional nursing that is culturally sensitive, appropriate, and competent. There is a discrete body of knowledge relevant to this nursing and many of the content factors are introduced in this chapter.
 - Culturally Sensitive implies that the caregivers possess some basic knowledge of and constructive attitudes toward the diverse cultural populations found in the setting in which they are practicing.
 - Culturally Appropriate implies that the caregivers apply the underlying background knowledge that must be possessed to provide a given patient with the best possible health care.
 - Culturally Competent implies that the caregivers understand and attend to the total context of the patient's situation including awareness of immigration status, stress factors, other social factors, and cultural similarities and differences (p. 14).
3. The values indicating heritage consistency exist on a continuum, and a person can possess value characteristics of both a heritage consistent (traditional: that is, living within the norms of their traditional culture) and a heritage inconsistent (modern: that is, acculturated to the norms of the dominant society). The concept of heritage consistency includes a determination of one's cultural, ethnic, and religious background and socialization experiences (p. 14).
4. Culture is:
 - (1) Learned from birth through the processes of language acquisition and socialization.
