**Place Advantage** Sally Augustin, Neil Frankel, Cindy Coleman, 2015-09-23 Using psychology to develop spaces that enrich human experience Place design matters Everyone perceives the world around them in a slightly different way but there are fundamental laws that describe how people experience their physical environments Place science principles can be applied in homes schools stores restaurants workplaces healthcare facilities and the other spaces people inhabit This guide to person centered place design shows architects landscape architects interior designers and other interested individuals how to develop spaces that enrich human experience using concepts derived from rigorous qualitative and quantitative research In Place Advantage Applied Psychology for Interior Architecture applied environmental psychologist Sally Augustin offers design practitioners accessible environmental psychological insights into how elements of the physical environment influence human attitudes and behaviors She introduces the general principles of place science and shows how factors such as colors scents textures and the spatial composition of a room as well as personality and cultural identity impact the experience of a place These principles are applied to multiple building types including residences workplaces healthcare facilities schools and retail spaces Building a bridge between research and design practice Place Advantage gives people designing and using spaces the evidence based information and psychological insight to create environments that encourage people to work effectively learn better get healthy and enjoy life The Science of People and Office Design Sally Augustin, Nigel Oseland, 2024-12-18 The Science of People and Office Design Planning for Thinking Discussing and Achieving has been written for practitioners who would like to apply evidence based and human centric design principles to office and workplace design Practitioner researcher disconnects often arise due to a lack of meaningful connection between their professional worlds This book seeks to rectify this disconnect and make it clear that research can significantly affect the likelihood that design projects achieve the objectives outlined in their briefs and that practitioners need to have a real influence on research conducted The book consists of 16 chapters each grouped into three major sections with an overview chapter and a conclusion drawn together by the editors Each chapter addresses a real world workplace design related issue The first part of each chapter presents the editors overview of the problem in practice and the objectives that must be achieved via design solutions The second portion of each chapter presents peer reviewed research related to the chapter s topic written by a researcher focused on practical issues The final part of each chapter is written by a workplace design practitioner and details their efforts to resolve the section s real world workplace design related concern by applying relevant peer reviewed research The book is aimed at professionals working in business interior design architecture surveying facilities management building services engineering human resources and psychology who are key stakeholders in the design and delivery of modern office spaces Postgraduates studying design architecture engineering facilities management environmental psychology and wellbeing will also find the book useful People-Centered Architecture:

Design Practice Education Milton Shinberg, 2025-06-25 Shinberg has done something truly impressive. He has created a practical framework for architectural thinking and design grounded in the latest research on human perception and cognition. His ideas and insights offer a fresh perspective that have helped me clarify many aspects of my own approach to design. Stefan Behling, Architect, Senior Executive Partner, Head of Studio Foster Partners, London. This book is a must read for architects and designers at any stage of their career. His inspiring and practical narrative makes even the most complex concepts accessible. Along the way, he offers aspiring and experienced professionals a fresh perspective to reignite their passion for architecture. Andrea de Paiva, Architect, Urban Planner and Author, Director of NeuroAU at the University of Brasilia. Milton Shinberg is at the vanguard of architects convinced that the design of buildings for people to flourish should incorporate a deep understanding of human psychology and neuroscience. A very clearly written book rich with reflections from the science of human emotions, embodiment, and aesthetics. People Centered Architecture will greatly enhance architectural thinking, education, and practice. Anjan Chatterjee, MD, FAAN, Professor of Neurology, Psychology, and Architecture, University of Pennsylvania. A veteran architect's pragmatic guide to re-energizing design thinking, architectural practice, and architectural education with pivotal insights from the human sciences and wisdom harvested from non-architects. People Centered Architecture: Design Practice Education is a unique and probing exploration designed to help architects better serve everyone who uses what architects design. In this one-of-a-kind book, architect and educator Milton Shinberg presents game-changing approaches to enhance, reorient, and re-energize design thinking. Shinberg draws from decades of dialogue with architects, designers, clients, artists, scientists, teachers, and his own students. His prompts and provocations, written in a clear and accessible narrative style, are organized to help architects who are humanists come to know much more about humans. Wise design becomes easier. In one concise volume, People Centered Architecture: Design Practice Education delivers a vibrant framework for architectural practice for students and teachers of architecture and for clients and stakeholders. Through this book, each will see their project partners more clearly, more empathetically, and in ways that foster richer, better brainstorming and more productive collaboration. The coalition of the curious people intrigued by architecture and architects will get a peek behind the curtain.

**My Creative Space** Donald M. Rattner, 2019-10-15. 48 Techniques to Boost Your Creativity at Home. According to science, creativity isn't all in your head. Sometimes it's in what's around you, especially when you're at home. For over twenty years, scientists have been discovering connections between our physical surroundings and the creative mind. Written by a noted architect, My Creative Space is the first book to turn this rich trove of psychological research into practical techniques for shaping a home that will boost your creativity. Here's a sampling of the techniques you'll learn about: Which colors lead to peak creative performance? How furniture affects idea flow? Pros and cons of messy versus neat environments? Optimal lighting and noise levels for achieving insights? How memorabilia can break creative logjams? Why ceiling height matters? Which scents improve creative problem solving? And more. *Perception of Beauty* Martha Levine, 2017-10-25 The authors in this book ask us to consider whether the perception of beauty has been defined by our genetics and culture over the years has it grown and changed Do certain neural connections define our emotional reactions to beauty Does beauty follow any rules or laws Can the aspiration toward beauty be detrimental Can we divorce ourselves from dictates and sink into a mindful connection with our internal beauty Can we move from the superficial where beauty is only skin deep to an intense appreciation of beauty in all of its variations The *Perception of Beauty* will lead to a deeper understanding and contemplation of nature art and the world around us *The Mathematics of the Modernist Villa* Michael J. Ostwald, Michael J. Dawes, 2018-04-12 This book presents the first detailed mathematical analysis of the social cognitive and experiential properties of Modernist domestic architecture The Modern Movement in architecture which came to prominence during the first half of the twentieth century may have been famous for its functional forms and machine made aesthetic but it also sought to challenge the way people inhabit understand and experience space Ludwig Mies van der Rohe's buildings were not only minimalist and transparent they were designed to subvert traditional social hierarchies Frank Lloyd Wright's organic Modernism not only attempted to negotiate a more responsive relationship between nature and architecture but also shape the way people experience space Richard Neutra's Californian Modernism is traditionally celebrated for its sleek geometric forms but his intention was to use design to support a heightened understanding of context Glenn Murcutt's pristine pavilions seemingly the epitome of regional Modernism actually raise important questions about the socio spatial structure of architecture Rather than focussing on form or style in Modernism this book examines the spatial social and experiential properties of thirty seven designs by Wright Mies Neutra and Murcutt The computational and mathematical methods used for this purpose are drawn from space syntax isovist geometry and graph theory The specific issues that are examined include the sensory and emotional appeal of space and form shifting social and spatial structures in architectural planning wayfinding and visual understanding and the relationship between form and program *Architect Knows Best* Simon Richards, 2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport high rise living and machine inspired aesthetics came under attack from the 1950s onwards and many alternative approaches

to architecture and planning emerged. It was thought that the environmental determinist strand of the discourse was killed off at this time as well. This book argues that it was not but on the contrary that it has deepened and diversified. Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large. By looking at and interviewing major figures and movements of recent years in Britain, Europe and America including L. Krier, Peter Eisenman, Andrés Duany, Jane Jacobs, Robert Venturi and Denise Scott Brown, it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings. In doing so, the book raises awareness of this strand within the discourse and examines its different purposes and manifestations. It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase, discusses why it is seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding. Richards does not provide any simple solutions but in conclusion is critical of architect planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings.

**Workplace Culture in Academic Libraries** Kelly Blessinger, Paul Hrycaj, 2013-02-11 Workplace culture refers to conditions that collectively influence the work atmosphere. These can include policies, norms and unwritten standards for behavior. This book focuses on various aspects of workplace culture in academic libraries from the practitioners' viewpoint as opposed to that of the theoretician. The book asks the following questions: What conditions contribute to an excellent academic library work environment? What helps to make a particular academic library a great place to work? Articles focus on actual programs while placing the discussion in a scholarly context. The book is structured into 14 chapters covering various aspects of workplace culture in academic libraries including: overview of workplace culture, assessment, recruitment, acclimation for new librarians, workforce diversity, physical environment, staff morale, interaction between departments, tenure track, academic culture, mentoring, coaching, generational differences, motivation, incentives, complaints, conflict management and organizational transparency. Includes the most current best practices and models in academic libraries. Represents the viewpoints of both the employee and manager. Focuses on the academic library as workplace rather than as a service provider.
