Dinar Camotim, Dan Dubina, Jacques Rondal, 2000-08-21 The subject of coupled instabilities is a fascinating field of research with a wide range of practical applications particularly in the analysis and design of metal structures Despite the excellent body of existing results concerning coupled instability structural behaviour this situation has not yet been adequately translated into design rules or specifications In fact only to a small extent do modern design codes for metal structures take advantage of the significant progress made in the field This book which contains all the invited general reports and selected papers presented at the Third International Conference on Coupled Instabilities in Metal Structures CIMS 2000 should provide a meaningful contribution towards filling the gap between research and practice *Inelastic Behaviour of Plates and Shells* Luiz Bevilacqua, Raul Feijoo, Roger Valid, 2012-12-06 During the last ten years a considerable volume of information has been accumulated regarding the inelastic behaviour of materials The increasing number of communications published in specialised journals and also the frequency of meetings in these fields indicates a considerable research effort aimed at such topics as plasticity creep fatigue visco plasticity and the like This fact encouraged a group of Brazilian researchers stimulated enthusiastically by Professor P Germain to submit a proposal for a Symposium on the Inelastic Behaviour of Plates and Shells to the General Assembly of IUTAM Brazil had recently joined IUTAM and the Brazilian Association of Mechanical Sciences was eager to host an IUTAM meeting In the selection of the subject it was taken into account besides a promising number of original contributions the interest to be raised amongst the Brazilian researchers and engineers in order to maximise the participation of the host country The recent steps taken in this country towards the development of the aero space industry the construction of nuclear power plants and the off shore exploration of petroleum have required an intensification of research activities in several fields structural behaviour of plates and shells being one of the most important Therefore the suggested theme would attract the interest of a significant group of Brazilian researchers and engineers and match the necessity for exchanging experience among leading scientists working in those fields
