Points Lines Diagrams And Projects For The City:

Points and Lines Stan Allen, 1999 This text collates Stan Allen's writings and projects that propose architectural strategies for the contemporary city. It presents speculative texts outlining Allen's general principles with specific projects created by his office in an interplay of theory and practice. Projects include the Cardiff Bay Opera House, Wales; the Korean American Museum of Art, Los Angeles; the Museo del Prado, Madrid; and White Columns Gallery, New York. Each project is accompanied by explanatory text as well as drawings, models, photographs, and computer renderings. **Paradoxien des Digital Turn in der Architektur 1990-2015** Carin M. Schirmacher, 2018-04-24 Dissertation der Staatlichen Akademie der Bildenden Künste Stuttgart zur Erlangung des Grades eines Doktor-Ingenieurs. *Metaphern für die Stadt* Sonja Hnilica, 2014-03-15 Architekten denken Städte in Metaphern von der Stadtlandschaft und dem urbanen Palimpsest zur Siedlungszelle oder dem Stadtgedächtnis. Während die Bedeutung von Metaphern in kreativen Prozessen seit längerem im Fokus der Wissenschaftsforschung steht, wurde sie in der Architektur bislang kaum beachtet. Sonja Hnilica schließt diese Lücke. Ausgehend von einer Lektüre der städtebaulichen Schriften Camillo Sittes untersucht sie Metaphern viel beachteter Architekten von Vitruv bis Rem Koolhaas und legt dabei einen direkten Zusammenhang zwischen Stadtmetaphern und architektonischen Konzepten offen. Ein frischer Blick auf zentrale Traditionen und Kontroversen des urbanistischen Diskurses.

Geospatial Intelligence: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-03-01 Decision makers such as government officials need to better understand human activity in order to make informed decisions. With the ability to measure and explore geographic space through the use of geospatial intelligence data sources including imagery and mapping data, they are better able to measure factors affecting the human population. As a broad field of study, geospatial research has applications in a variety of fields including military science, environmental science, civil engineering, and space exploration. *Geospatial Intelligence: Concepts, Methodologies, Tools, and Applications* explores multidisciplinary applications of geographic information systems to describe, assess, and visually depict physical features and to gather data, information, and knowledge regarding human activity. Highlighting a range of topics such as geovisualization, spatial analysis, and landscape mapping, this multi-volume book is ideally designed for data scientists, engineers, government agencies, researchers, and graduate-level students in GIS programs. **The Urbanism of**

Metabolism Raffaele Pernice, 2022-03-16 This edited book explores and promotes reflection on how the lessons of Metabolism experience can inform current debate on city making and future practice in architectural design and urban planning. More than sixty years after the Metabolist manifesto was published, the author's original contributions highlight the persistent links between present and past that can help to re-imagine new urban futures as well as the design of innovative intra-urban relationships and spaces. The essays are written by experienced scholars and renowned academics from Japan, Australia, Europe, South Korea, and the United States and expose Metabolism's special merits in promoting new urban models.

and evaluate the current legacy of its architectural projects and urban design lessons They offer a critical intellectual and up to date account of the Metabolism projects and ideas with regard to the current evolution of architectural and urbanism discourse in a global context The collection of cross disciplinary contributions in this volume will be of great interest to architects architectural and urban historians as well as academics scholars and students in built environment disciplines and Japanese cultural studies

Spatializing Justice Teddy Cruz, Fonna Forman, 2022-10-25 A manifesto calling for a new kind of architecture that confronts social and economic inequality and uneven urban growth Spatializing Justice calls for architects and urban designers to do more than design buildings and physical systems Architects should take a position against inequality and practice accordingly With these thirty short manifesto like texts building blocks for a new kind of architecture Spatializing Justice offers a practical handbook for confronting social and economic inequality and uneven urban growth in architectural and planning practice urging practitioners to adopt approaches that range from redefining infrastructure to retrofitting McMansions These building blocks call for expanded modes of practice through which architects can imagine new spatial procedures political and economic strategies and modalities of sociability Challenging existing exclusionary policies can advance a more experimental architecture not bound by formal parameters Architects must think of themselves as designers not only of things but of civic processes complicate the ideas of ownership and property and imagine new sites of research pedagogy and intervention As one of the texts advises The questions must be different questions if we want different answers Copublished with Hatje Cantz Verlag

Expanding Disciplinarity in Architectural Practice Tom Holbrook, 2016-11-03 Expanding Disciplinarity in Architectural Practice presents an argument for the role of an architect as a generalist with a particular ability to bring spatial intelligence to bear on the significant issues of planning settlement and identity The book draws on strategy and planning landscape infrastructure urbanism historical conservation and interpretation architecture and the creative reuse of existing structures to encourage you to incorporate a holistic approach to your designs Tracing a series of projects developed by his practice 5th Studio author Tom Holbrook argues the critical importance of involving spatial practitioners in large scale strategies and designs to combine interdisciplinary thinking and concrete experience of buildings The book incorporates interviews with prominent figures in the field of architecture eleven UK case studies and over 200 beautiful illustrations including the author's own award winning designs With twenty years of evolving practical experience together with associated research teaching and writing Holbrook shows you how a participatory infrastructure creates a crucial bridge between strategic thinking and the reality of the built environment This book is a must read for professionals seeking to incorporate broader design strategy into their practice

Constructing a New Agenda A. Krista Sykes, 2012-03-20 This follow up to Kate Nesbitt's best selling anthology Theorizing a New Agenda collects twenty eight essays that address architecture theory from the mid 1990s where Nesbitt left off through the present Kristin Sykes offers an overview of the myriad approaches and attitudes adopted by architects and architectural theorists

during this era Multiple themes including the impact of digital technologies on processes of architectural design production materiality and representation the implications of globalization and networks of information the growing emphasis on sustainable and green architecture and the phenomenon of the starchitect and iconic architecture appear against a background colored by architectural theory as it existed from the 1960s on in a period of transition if not crisis that centers around the perceived abyss between theory and practice Theory's transitional state persists today rendering its immediate history particularly relevant to contemporary thought and practice While other collections of recent theoretical writings exist none attempt to address the situation as a whole providing in one place key theoretical texts of the past decade and a half This book provides a foundation for ongoing discussions surrounding contemporary architectural thought and practice with iconic essays by Greg Lynn Deborah Berke Sanford Kwinter Samuel Mockbee Stan Allen Rem Koolhaas William Mitchell Anthony Vidler Micahel Hays Reinhold Martin Reiser Umemoto Glenn Murcutt William McDonough Micahael Braungart Michael Speaks and many more

Seoul Rafael Luna, 2024-04-30 This book focuses on understanding how a megacity like Seoul can be read as a formal architectural composition and not an endless urban sprawl In a broader sense the book discusses the dichotomy between city and urbanization city being an architectural problem of bounded forms while urbanism is an infrastructural project of expansion It is an uncontested reality that urbanization is a continuous global process that has produced nebulous conurbations labeled as megacities These expand beyond the virtual administrative boundary of any said city producing a discrepancy between an area of administrative control and the real physical condition of human settlement If there were a better formal understanding of megacities through their typological architectural conditions then there could be a better assessment of the qualitative state of urbanization Avant garde groups from the 1950s 1960s and 1970s such as Team X the Situationist the Structuralist and the Metabolist worked with ideas of megaforms and megastructures to address this issue Although most of these proposals remained as paper architecture this book reevaluates some of these ideas for the 21st century megacity using Seoul as a case study due to its clear typological formations produced over its different periods of governance The aim is to present the concept for an infra architectural hybrid model of typological islands and subterranean megastructure that organizes Seoul as a flexible multi linear city This book will be of interest to academics and students of architecture urban geography and Asian studies

Architecture and the Forest Aesthetic Jana VanderGoot, 2017-12-22 Despite population trends toward urbanization the forest continues to have a strong appeal to the human imagination and the human preference for forest over many other types of terrain is well documented This book reimagines architecture and urbanism by allowing the forest to be a prominent consideration in the language of design thus recognizing the forest as essential rather than just incidental to human well being In *Architecture and the Forest Aesthetic* forest is a large scale urban construct that is far more extensive and nuanced than trees and shrubbery The forest aesthetic

opens designers to the forest as a model for an urban architecture of permeable floors protective canopies connected food chains beneficial decomposition and resilient ecologies Much can be learned about these features of the forest from the natural sciences however when they are given due consideration technically and metaphorically in the design of urban habitat the places in which humans live become living forests What is present here in Architecture and the Forest Aesthetic is both a review of many ingenious ways in which the forest aesthetic has already been expressed in design and urbanism and an encouragement to further use the forest aesthetic in design language and design outcomes Case study projects featured include the Chilotan building craft of Southern Chile the yaki sugi of Japan the Biltmore Forest in the Southeastern United States the Australian capital city Canberra Bosco Verticale in Milan Italy the Beijing Olympic Forest Park in China and more

Residential Architecture as Infrastructure Stephen H. Kendall, 2021-11-29 This edited collection provides an up to date account by a group of well informed and globally positioned authors of recently implemented projects public policies and business activities in Open Building around the world Countless residential Open Building projects have been built in a number of countries some without knowledge of the original theory and methods These projects differ in architectural style building industry methods economic system and social aims National building standards and guidelines have been promulgated in several countries Finland China Japan Korea providing incentives and guidance to Open Building implementation Businesses in several countries have begun to deliver advanced FIT OUT systems both for new construction and for retrofitting existing buildings demonstrating the economic advantages of the responsive independent dwelling This book also argues that the open building approach is essential for the reactivation of the existing building stock for long term value because in the end it costs less The book discusses these developments in residential architecture from the perspective of an infrastructure model of built environment This model enables decision makers to manage risk and uncertainty while avoiding a number of problems often associated with large fast moving projects such as separation and distribution of design tasks and responsibility and the ensuing boundary frictions *Residential Architecture as Infrastructure* adds to the Routledge Open Building Series and will appeal to architects urban designers researchers and policy makers interested in this international review of current projects policies and business activities focused on Open Building implementation

Empathic Space Christian Derix, Åsmund Izaki, 2014-10-27 In recent years questions of space have gained renewed momentum in architecture and urban design as adaptation densification and sustainable regeneration have become an increasing priority While most computing based design tends to emphasise the formal aspects of architecture overlooking space and its users the original computational design approaches first spearheaded in the UK in the 1960s and 1970s tended to be focused on behavioural and occupational patterns Over the last decade a new generation of design research has

emerged that has started to implement and validate previous investigations into spatial computation aiming to understand how to design spatial configurations based on user experiences This revives an interest in the experiential that was first explored in the early 20th century by German and Nordic organic architects who invented design methods that correlated cognitive responses of buildings occupants to spatial structure The current revival of human centric design however represents the first design approach that synthesises spatial design and algorithmic techniques with organic design thinking which could also be regarded as a return to the first principles of architectural design Contributors include Paul Coates Christian Derix Olafur Eliasson Lucy Helme Bill Hillier smund Izaki Prarthana Jagannath Dan Montello Juhani Pallasmaa Philip Steadman and Guy Theraulaz Featured Architects Designers Jussi ngeslev Art Com Stan Allen Aedas R D Markus Braach Kaisersrot Hermann Hertzberger Kazuhiro Kojima Cat Pablo Miranda and Rafi Segal

Interpreting Site Genevieve Baudoin,2015-04-17 Interpreting Site explains the basic methods architects use to translate what you perceive to represent the complex conditions that physically and mentally construe a site helping to shape the ultimate design Within each of the four themes defining site experiencing site spatializing site and systematizing site theoretical conceptual and analytic methods and representational tools are introduced to give you a foundation to develop your own approach to the conditions of a site Author Genevieve S Baudoin examines longstanding representation methods in relation to emerging and experimental methods offering an idiosyncratic and provocative look at different approaches Four highly illustrated full colour case studies of key contemporary projects in Spain the United States the United Kingdom and Norway demonstrate how architects have used conditions discovered on a site in their final design *MIAW 2020* Matteo Poli,Micaela Ortega,2020-09-30 The MIAW Milan International Architecture Workshop is the international intensive programme at the Politecnico di Milano School of Architecture Urban Planning Construction Engineering that provides an international design forum for schools teachers and students but it is also an informal platform to discuss issues and share ambitions that education implies Its aim is to stimulate cross over thinking between researches and practitioners in the design field involving different scales and encouraging an interdisciplinary approach towards design problems Each class has an international guest professor of high profile whose activity and interests are related to the different study courses and disciplinary areas characterising our School

Infrastructural Optimism Linda C. Samuels,2021-09-29 *Infrastructural Optimism* investigates a new kind of twenty first century infrastructure one that encourages a broader understanding of the interdependence of resources and agencies recognizes a rightfully accelerated need for equitable access and distribution and prioritizes rising environmental diligence across the design disciplines Bringing together urban history case studies and speculative design propositions the book explores and defines infrastructure as the basis for a new form of urbanism emerging from the intersection of architecture landscape architecture and urban design In defining this new infrastructure

the book introduces new dynamic and holistic performance metrics focused on measuring what matters over growth for the sake of growth and twelve criteria that define next generation infrastructure By shifting the focus of infrastructure our largest public realm to environmental symbiosis and quality of life for all design becomes a catalytic component in creating a more beautiful productive and optimistic future with Infrastructural Urbanism as its driver Infrastructural Optimism will be invaluable to design non profit and agency professionals and faculty and students in the fields of architecture landscape architecture and urban design working in partnership with engineers hydrologists ecologists urban planners community members and others who shape the built environment through the expanded field of infrastructure **Vernacular**

Points Lines Diagrams And Projects For The City: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have charmed audiences this year. Points Lines Diagrams And Projects For The City : Colleen Hoover "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Points Lines Diagrams And Projects For The City : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
