Middle East Politics and International Relations Shahram Akbarzadeh, Kylie Baxter, 2018 The contemporary Middle East has been defined by political crises and conflict The interplay of internal and external factors have set the region on a path of turmoil and crisis with devastating outcomes for its people The absence of political accountability and representation and policies pursued by the United States to keep US friendly regimes in power have been two key factors that have contributed to the seemingly insoluble Middle East politics This book provides a detailed exploration of the forces internal and external that have shaped today's Middle East The book follows a chronological order and provides context to major political milestones Topics explored include Imperialism in the Middle East The formation of the State of Israel The Arab Israeli wars Palestinian politics and the failure of the peace process The Iranian Revolution and pan Shi ism Superpowers in the Middle East The US led War on Terror The Arab uprisings The Syrian War and the rise of the Islamic State US Iran relations This study puts

Ismael, Glenn E. Perry, 2013-10-01 The Middle East a few decades ago was seen to be an autonomous subsystem of the global international political system More recently the region has been subordinated to the hegemony of a singular superpower the US bolstered by an alliance with Israel and a network of Arab client states The subordination of the contemporary Middle East has resulted in large part from the disappearance of countervailing forces for example global bipolarity that for a while allowed the Arab world in particular to exercise a modicum of flexibility in shaping its international relations The aspirations of the indigenous population of the Middle East have been stifled by the dynamics of the unequal global power relationships and domestic politics of the countries of the region are regularly subordinated to the prerogatives of international markets and the strategic competition of the great powers Employing the concept of imperialism defined as a pattern of alliances between a center rulers in the Center developed country and a center client regime in the Periphery underdeveloped country as an overall framework to analyse the subordination of the region this book is essential reading for students and scholars of the Middle East International Relations and Politics in general New Perspectives on Middle East Politics Robert Mason, 2021 This compelling volume examines important and cross cutting themes in the study of contemporary Middle East and North African politics and international relations Drawing together contributions from scholars based within the region and beyond it weaves together essential interdisciplinary conceptually rich and forward looking content Chapters cover population and youth civil military relations soft power and geopolitical competition regionalization and internationalization of conflict the role of oil in
