**Raced Markets** Lisa Tilley, Robbie Shilliam, 2021-05-30 Despite rich archives of work on race and the global economy most notably by scholars of colour and Global South intellectuals the discipline of Political Economy has largely avoided an honest confrontation with how race works within the domains it studies not least within markets By way of corrective this book draws together scholarship on the material function of race at various scales in the global political economy The collective provocation of the contributors to this volume is that race has been integral to the formation of capitalism as extensively laid out by the racial capitalism literature and takes on new forms in the novel market spaces of neoliberalism The chapters within this volume also reinforce that the current political conjuncture marked by the ascension of neo fascist power cannot be defined by an exceptional intrusion of racism nor can its racism be dismissed as epiphenomenal Raced Markets will be of great value to scholars students and researchers interested in political economy and racial capitalism as well as those willing to explore how race takes on new forms in the novel market spaces of contemporary neoliberalism The chapters in this book were originally published as a special issue of the New Political Economy

**Complexity Economics** Olivér Kovács, 2022-07-15 Our socio economic innovation ecosystem is riddled with ever increasing complexity as we are faced with more frequent and intense shocks such as COVID 19 Unfortunately addressing complexity requires a different kind of economic governance There is increasing pressure on economics to not only going beyond its traditional mainstream boundaries but also to tackle real world problems such as fostering structural change enhancing sustained growth promoting inclusive development in the era of the digital economy and boosting green growth while addressing the divide between the financial sector and the real economy This book demonstrates how to apply complexity science to economics in an effective and instructive way in the interest of life enhancing policies The book revolves around the non negligible problem of why economics to date seems to be inadequate in guiding economic governance to navigate through real and ever intensifying complex socio economic and environmental challenges With its interdisciplinary approach the book scans the nuanced nexus between complexity and economics by incorporating as well as transcending the state of the art literature It identifies ways to trigger opportunities for behavioural change in the economic profession with respect to how and what to teach introducing and developing further complexity economics taking into account the configuration of its main principles and outlining the silhouette of next generation economic governance The

Aydinonat, Jack Vromen, 2017-10-02 Best selling books such as Freakonomics and The Undercover Economist have paved the way for the flourishing economics made fun genre While books like these present economics as a strong and explanatory science the ongoing economic crisis has exposed the shortcomings of economics to the general public In the face of this crisis many people including well known economists such as Paul Krugman have started to express their doubts about whether economics is a success as a science As well as academic papers newspaper columns with a large audience have discussed the failure of economic to predict and explain ongoing trends The emerging picture is somewhat confusing economics made fun books present economics as a method of thinking that can successfully explain everyday and freaky phenomena On the other hand however economics seems to fail in addressing and explaining the most pressing matters related to the field of economics itself This book explores the confusion created by this contradictory picture of economics Could a science that cannot answer its own core questions really be used to explain the logic of everyday life This book was originally published as a special issue of the Journal of Economic Methodology *A Beta-return Efficient Portfolio Optimisation Following the CAPM* Markus Vollmer, 2014-07-17 Investors are trying to generate excess returns through active investment strategies Since the outbreak of the financial crisis investors face a situation where increased risks are accompanied by falling key interest rates An optimal portfolio in terms of risk and return becomes a perpetual motion machine Markus Vollmer answers the question how the seemingly impossible could still be achieved by an empirical analysis of historical data of 1 800 stocks listed at equity markets in 24 countries covering all 19 super sectors The author offers valid and reliable findings by using the previously mentioned data proxy He reveals purposefully the need for further research and simultaneously he derives specific and applicable guidelines for the design of investment strategies which are extremely exciting for both the institutional expert and the private investor
