Casting Design and Performance ,2009 Principles of Metal Casting Richard W. Heine,Carl R. Loper,Philip C. Rosenthal,1967 METAL CASTING B. RAVI,2005-01-01 This book presents a scientific approach to metal casting design and analysis supported by software tools Unlike other books in metal casting focused only on the process know how this book uncovers the know why as well Besides serving the needs of students of mechanical production and metallurgical engineering this book is equally meant to benefit practicing engineers involved or interested in casting development including product designers toolmakers foundry engineers supply chain managers engineering consultants researchers and software developers The theory discussed in the book is applicable to all types of castings ferrous and non ferrous produced in sand and metal moulds By gaining a better understanding of the theory and logic involved through creating analysing and optimizing virtual castings the readers will learn how to Design process friendly cast products leading to shorter development time Manufacture assured quality castings leading to fewer rejections and surprises Manage material and energy utilization leading to higher yield and lower costs Metal Casting Engineering Zainul Huda,2025-03-21 This book covers all main aspects of metal casting processes and practices including mold gating system design melting of metal solidification QC QA safety economic and environmental considerations The flow and solidification of metal is presented with reference to Bernoulli s Law Fick s 2nd law and Chvorinov s rule with detailed mathematical analyses and calculations Foundry practices involving mold design molding sand characteristics melting furnaces testing NDT and QC are explained including both conventional casting processes and recent advances in casting technologies There are around 120 diagrammatic illustrations which have been properly labelled to enhance the understanding of readers One of the salient features of the book is the inclusion of an industrially oriented project the key solution of the project is presented with the aid of mathematical analysis and diagrams The metal casting design project cultivates managerial skills enabling the reader to work effectively as an engineer manufacturing manager in an industry Fundamentals of Modern Manufacturing Mikell P. Groover,2010-01-07 Engineers rely on Groover because of the book s quantitative and engineering oriented approach that provides more equations and numerical problem exercises The fourth edition introduces more modern topics including new materials processes and systems End of chapter problems are also thoroughly revised to make the material more relevant Several figures have been enhanced to significantly improve the quality of artwork All of these changes will help engineers better understand the topic and how to apply it in the field Metal Casting Steve Chastain,2004 METAL CASTING AND JOINING JOHN, K. C.,2015-01-02 Designed for the undergraduate students of mechanical engineering and allied branches this book serves as a bridge between the study of the basic processes and their application in production industries This book covers two similar fundamental processes foundry and welding in a single volume The chapters of the book are grouped in seven modules A separate module is devoted to introduce the preliminaries of the two areas namely casting and

joining processes Miscellaneous welding and allied processes including the modern methods and thermal cutting conventional sand mould casting special and modern casting methods conventional metal joining processes and theory of solidification of metal its metallurgy defects in castings and casting design procedure are covered in the book The theory of each process is explained with the help of simple line sketches which can be easily reproduced by a student at the time of examination Enough worked out examples and problems are given for practice especially in the design areas At the end of each chapter sufficient number of review questions are given as exercise
