motivated functional principles it is argued that the relative frequency of basic constituent order types is due to the tendency for the three principles to be maximally realized in the world s languages SOV and SVO languages are typologically most frequent because such basic orders reflect all three principles The remaining orders occur less frequently because they reflect fewer of the principles The 1 000 language database and the genetic and areal classification frames are published as appendices to the volume *Fundamental Concepts of Language Teaching* H. H. Stern,1983-03-24 Professor Stern puts applied linguistics research into its historical and interdisciplinary perspective He gives an authoritative survey of past developments worldwide and establishes a set of guidelines for the future There are six parts Clearing the Ground Historical Perspectives Concepts of Language Concepts of Society Concepts of Language Learning and Concepts of Language Teaching
