

Model Paragraph 1: Problem

Deforestation is a serious problem because forests and trees aren't just pretty to look at, they do an important job making the earth's environment suitable for life. They clean the air, store water, preserve soil, and provide homes for animals. They also supply food, fuel, wood products, and paper products for humans. In the past fifty years, more than half of the world's rain forests have been destroyed. Today, the forests of the world are being cut down at a rate of fifty acres every minute! Scientists say that if deforestation continues, the world's climate may change, floods may become more common, and animals will die.
