Process and Procedure in EU Administration Carol Harlow, Harlow KC, Richard Rawlings, 2014-11-20 This book is about the administrative procedures of the European Union, which we see as the super glue holding in place the sprawling structures of the EU governance system. The early chapters deal with the structures expansively defined, the diverse functions of administrative procedures in the EU, and the values that underpin them, concentrating on the respective contributions of the legislature and administration. A separate chapter deals with the important procedural function of rights protection through the two Community Courts and the contribution of the European Ombudsman. We then turn to horizontal or general procedures dealing with executive law making, transparency, and the regulation of government contracting. A study of Commission enforcement procedure ends the section. Vertical or sector specific studies in significant areas of EU

administration follow including competition policy cohesion policy structural funds and financial services regulation Separate chapters deal with policing cooperation through Europol and with the interplay of international and EU institutions in the fields of environmental procedure and human rights The final chapter contains the authors reflections on current proposals for codification but ends with a general evaluation of the role and contribution of administrative procedure in the construction of the EU

Principles of Administrative Procedure in EC Law Hanns Peter Nehl,1999-01-01 This book presents an analysis of the recent development of administrative procedures in EC law It is a pathbreaking study of what might be termed the constitutionalising norms now emerging including a range of process rights and procedural standards such as the right to access to information the right to be heard the principle of care and duty to state reasons These new standards are increasingly applied in areas as diverse as competition State aids customs matters anti dumping and the European Social Fund Different strands of case law of the EC courts are thus connected to document the overall evolution of procedural rules peculiar to the EC administrative system as a whole The author adopts a critical stance in particular towards the case law of the Court of First Instance and points out the increasing pressure being brought to bear on the European Commission in respect of its procedural requirements Particular emphasis is placed on the concept of care i e the duty to collect and examine the factual and legal points of individual cases impartially and carefully The book reveals both the theoretical and practical relevance of this principle as a means of both procedural and substantive review and the reasons why it is likely to be misinterpreted by the courts

Regulation and Public Interests Steven P. Croley,2009-01-10 Not since the 1960s have U S politicians Republican or Democrat campaigned on platforms defending big government much less the use of regulation to help solve social ills And since the late 1970s deregulation has become perhaps the most ubiquitous political catchword of all This book takes on the critics of government regulation Providing the first major alternative to conventional arguments grounded in public choice theory it demonstrates that regulatory government can and on important occasions does advance general interests Unlike previous accounts Regulation and Public Interests takes agencies decision making rules rather than legislative incentives as a central determinant of regulatory outcomes Drawing from both political science and law Steven Croley argues that such rules together with agencies larger decision making environments enhance agency autonomy Agency personnel inclined to undertake regulatory initiatives that generate large but diffuse benefits while imposing smaller but more concentrated costs can use decision making rules to develop socially beneficial regulations even over the objections of Congress and influential interest groups This book thus provides a qualified defense of regulatory government Its illustrative case studies include the development of tobacco rulemaking by the Food and Drug Administration ozone and particulate matter rules by the Environmental Protection Agency the Forest Service s roadless policy for national forests and regulatory initiatives by the Securities and Exchange Commission and the Federal Trade Commission
