

Project 4 - Financials (Excel)

Project Objective

To offer an introduction to building spreadsheets, creating charts, and entering functions.

Part 1 - Financial Projections

One of the most important aspects of analyzing the feasibility and profitability of a new business is creating financial statements, projecting cash flows, and keeping track of information. For the purpose of this part, you will be creating a 3-year income statement for two different business opportunities: 1) operating a plant in *Location A* or 2) operating a plant in *Location B*. This will allow you to assess the profitability of your new endeavor after a few years of commerce and therefore make an informed decision as to which opportunity you should pursue. You will begin by creating the 3-year income statement for *Location A*.
