Proof that John Lennon Faked his Death

Mark Staycer or John Lennon?

by Miles Mathis

This has been a theory from the very beginning, as most people know, but all the proof I have seen up to now isn't completely convincing. What we normally see is a lot of speculation about the alleged shooting in December of 1980. Many discrepancies have indeed been found, but I will not repeat them (except for a couple in my endnotes). I find more recent photographic evidence to be far easier and quicker to compile—and more convincing at a glance, as it were—so that is what I will show you here. All this evidence is based on research I did myself. I am not repeating the work of anyone else and I take full responsibility for everything here. If it appeals to you, great. If not, feel free to dismiss it. That is completely up to you, and if you don't agree, fine. When I say "proof" in my title, I mean it is proof enough for me. I no longer have a reasonable doubt.

This paper wouldn't have been possible if John had stayed well hidden, but as it turns out he still likes to play in public. Being a bit of an actor, and always being confident is his ability to manipulate the public, John decided to just do what he wanted to do, covering it just enough to fool most people. This he has done, but he hasn't fooled me.

The biggest clues come from a little indie film from Toronto about Lennon called *Let Him Be*, released in 2009, with clips still up on youtube as of 2014. It is chock full of big red flags. The first red flag is the title, which is a prominent part of the psychological operation (psy-op). [The film is a pretend hunt for a living John Lennon](#), but the message is there in the title: let him be! "He *isn't* still alive; but even if he is, let him be!" In the film, they tell you they have found a guy who looks exactly like Lennon would look at this age. And in the interviews for the film, they tell you they have found a Lennon impersonator who looks exactly like Lennon would look at this age, to play the part in the film. So they have an actor named Mark Staycer playing a character named Noel Snow who other characters think may be John Lennon. So we have a bluff inside a bluff inside a bluff. Inside a bluff. The film is basically a psy-op that backfired and had to be suppressed. They produce these things to take you close to the truth and then ricochet you off on some tangent. But they took you so close to the truth the

[Conspiracy Encyclopedia](#) Thom Burnett,2006 Conspiracies are everywhere they are the lifeblood of politics business and our daily lives this truly international and all embracing encyclopedia explains the details of the world's major popular conspiracies listing them chronologically under subject matter and cross referencing them continually because so many conspiracy theories interact on some level Conspiracies are often international in their sweep and their impact the brutal stabbing of Julius Caesar the conspiracy which has defined political assassinations ever since plunged the Roman Empire into civil war which then engulfed much of the known western world More recently the Cambridge spies Philby Blunt MacLean and Burgess helped

Russia throughout WWII and then re defined the Cold War afterwards Philby s defection casting a 30 year shadow over CIA Anglo American relations though conspiracies define our everyday lives there is no body of serious academic research to understand their role nature or defining characteristics Most historians prefer to adhere to the cock up theory of history in which everything happens by accident or incompetence Although this view is favoured by academics and historians it is rejected by a large part of the general public who prefer the evidence of their own lives However they consume their media what they see is a mesh of conspiracies that define the texture of their everyday lives often for the worst Most people believe that there is a grain of truth in most theories about conspiracies this book is for them **The Science of Good and Evil**
