

Part 1: Multiple Choice. Circle the letter corresponding to the best answer.

1. Which of the following is NOT one of the basic assumptions that must be satisfied in order to perform inference for regression of y on x ?
 - (a) For each value of x , the corresponding population of y -values is normally distributed.
 - (b) The standard deviation σ of the population of y -values corresponding to a particular value of x is always the same regardless of the specific value of x .
 - (c) The sample size (the number of paired observations n), ρ , is the sample-based estimate of ρ .
 - (d) There exists a sample line $\hat{y} = a_0 + \hat{\beta}x$ such that for each value of x , the mean μ_y of the corresponding population of y -values lies on that sample line.
2. If the assumptions for inference in regression are met, then a normal probability plot of the residuals should be
 - (a) bell-shaped
 - (b) a group of randomly scattered points
 - (c) straight-line
 - (d) closely curved
3. If a test of hypothesis rejects the $H_0: \beta = 0$ in favor of the alternative hypothesis $H_a: \beta \neq 0$, where β is the population regression slope, then the least-squares regression line
 - (a) slopes downward and to the right when plotted on the x -axis of paired observations (x, y) .
 - (b) is useful for predicting y given x within the limits of x -values covered by the data.
 - (c) Can be extrapolated beyond the limits of the x -values covered by the data to predict y at any possible x .
 - (d) is not useful for predicting y given x .
4. Inference for regression on the population regression slope β is based on which of the following distributions?
 - (a) The t -distribution with $n - 1$ degrees of freedom.
 - (b) The standard normal distribution.
 - (c) The chi-square distribution with $n - 1$ degrees of freedom.
 - (d) The t -distribution with $n - 2$ degrees of freedom.
5. Suppose that inference for regression is conducted on the following small data set:

x_1	x_2	x_3	x_4	x_5	x_6	x_7	x_8	x_9	x_{10}
1	2	3	4	5	6	7	8	9	10

 The number of degrees of freedom for variance estimate is
 - (a) 4
 - (b) 7
 - (c) 2
 - (d) Inference cannot be conducted on this data set because it is too small.
 - (e) The answer cannot be determined from the information given.
