Green Toxicology Alexandra Maertens,2022-02-16 Green toxicology is an integral part of green chemistry One of the key goals of green chemistry is to design less toxic chemicals Therefore an understanding of toxicology

and hazard assessment is important for any chemist working in green chemistry but toxicology is rarely part of most chemists education As a consequence chemists lack the toxicological lens necessary to view chemicals in order to design safer substitutions This book seeks to fill that gap and demonstrate how a basic understanding of toxicology as well as the tools of in silico and in vitro toxicology can be an integral part of green chemistry R D chemists product stewards and toxicologists who work in the field of sustainability can all benefit from integrating green toxicology principles into their work Topics include in silico tools for hazard assessment toxicity testing and lifecycle considerations this book aims to act as a bridge between green toxicologists and green chemists *Society Records* American Society of Mechanical Engineers,1973
