## AP Human Geography - Chapter Six: Religion

1. What questions about religion do geographers try to answer? Where and Why?

2. Why do geographers find the tensions between globalization and local diversity especially acute in religion? (Give five reasons.)

1. People care deeply about their religion and draw their core values and beliefs from it
2. Some religions have universal appeal and others local appeal
3. Religious values show how people feel and the meaningful ways they alter the landscape
4. Most (but not all) religions require strict adherence, so adopting a global religion could mean turning away from traditional local religion
5. Migrants take their religion with them and typically don't adopt a new religion, but unlike language retain their own

3. Explain how universalizing religions differ from ethnic religions: Universalizing religions attempt to be global and appeal to all people, not to just one culture or location. An ethnic religion appeals primarily to one group of people living in one place

4. Identify each of the following:

- a. Religious branch: a large and fundamental division within a religion
- b. Religious denomination: a division of a branch that unites a number of local congregations in a single legal and administrative body
- c. Religious sect: a relatively small group that has broken away from an established denomination

5. Name the three universalizing religions

- a. Christianity
- b. Islam
- c. Buddhism

**Geography, Religion, Gods, and Saints in the Eastern Mediterranean** Erica Ferg, 2020-01-16 Geography Religion Gods and Saints in the Eastern Mediterranean explores the influence of geography on religion and highlights a largely unknown story of religious history in the Eastern Mediterranean In the Levant agricultural communities of Jews Christians and Muslims jointly venerated and largely shared three important saints or holy figures Jewish Elijah Christian St George and Muslim al Khi r These figures share peculiar characteristics such as associations with rain greenness fertility and storms Only in the Eastern Mediterranean are Elijah St George and al Khi r shared between religious communities or characterized by these same agricultural attributes attributes that also were shared by regional religious figures from earlier time periods such as the ancient Near Eastern Storm god Baal Hadad and Levantine Zeus This book tells the story of how that came to be and suggests that the figures share specific characteristics over a very long period of time because these motifs were shaped by the geography of the region Ultimately this book suggests that regional geography has influenced regional religion that Judaism Christianity and Islam are not historically or textually speaking separate religious traditions even if Jews Christians and Muslims are members of distinct religious communities and that shared religious practices between members of these and other local religious communities are not unusual Instead shared practices arose out of a common geographical environment and an interconnected religious heritage and are a natural historical feature of religion in the Eastern Mediterranean This volume will be of interest to students of ancient Near Eastern religions Judaism Christianity Islam sainthood agricultural communities in the ancient Near East Middle Eastern religious and cultural history and the relationships between geography and religion *AP Human Geography Premium, 2024: 6 Practice Tests + Comprehensive Review + Online Practice* Meredith Marsh, Peter S. Bhadrajee S. Hewage, 2022-08-04 Our understanding that the Buddha emerged from the Middle Gangetic region of the Indian subcontinent has been largely unchallenged for the past 200 years However can we truly trust our existing knowledge regarding the geographical locations associated with early Buddhism Could the Buddha s origins in fact lie elsewhere Tracking the general theory explaining the Buddha s emergence from the Middle Ganges this book explores the lesser known story of colonial Sri Lanka s connections to the wider nineteenth century orientalist quest of placing the Buddha across the northern expanses of the subcontinent By doing so this book highlights the many flaws and inconsistencies that continue to

inform our current understanding of the Buddha's geographical origins and urges us to rethink the very foundation on which our knowledge of early Buddhism is based

**Emerging Geographies of Belief** Catherine Brace, 2010-10-12 This interdisciplinary book presents new research from international scholars that explores questions of belief faith and religion Focusing on theoretically informed cultural geographical and historical analyses of faith belief religion society and space the book presents new and revised theoretical approaches and methodologies grounded in rigorous empirical research both contemporary and historical The volume takes a deliberately eclectic approach reflecting the complex interactions of the political and poetic dimensions of sacredness in contemporary societies Taking this research agenda forward this book explores how religious beliefs inform and construct social identities public knowledge and modes of governance In particular the book meets an urgent need for a critical understanding of how terms such as religion faith fundamentalism and secularism for example inform public debates and foster constructive engagements both between faith groups and between people of faith and people of no faith The essays in *Emerging Geographies of Belief* also show that religion cannot be mapped neatly onto faith or belief We attempt to tease out the different circumstances in which for example belief can operate without religious adherence or faith can inspire social action in geographies of hope The geography of the title relates to an overarching concern with space and spatiality rather than describing a single disciplinary approach Our concern with belief faith and religion operates at different temporal and spatial scales in different localities from the contemporary appeal to a more global sense of responsibility to a historically situated account of faith led educational practices This reflects more generally the so called spatial turn in the social sciences and humanities But despite this wide historical and geographical sweep the authors share some key concerns This collection is unique in combining theoretical conceptual and discursive approaches to the emerging geographies of belief with substantive examples of the intersection of belief faith and religion with aspects of everyday life Discussions of the potential subversive and prophetic capacities of faith belief and religion sit alongside consideration of how these have become implicated in the spaces and performances of hope It provides a critique of the situationist and substantive approaches to religion along with insights into the role of faith in education community and social work It considers the practices of remembrance representation and pilgrimage and the place of religion in contemporary identity politics In sum the book problematises the seemingly simple categories of faith religion and belief calling attention to how these are mobilised and implicated differently in different circumstances In addressing these themes the book provides a key theoretical resource but crucially goes on to show how multiple perspectives on belief however defined can be applied in practice Whilst there has

been much contemporary work on the individual areas covered by the book they have not been bought together before to provide a dynamic insight into issues of the most pressing relevance *Geographical Thoughts in India* Rana Singh, 2009-05-27 This book deals with roots of Indian geographical thoughts with reference to its historical base cultural context and visionary message As a consequence of long cultural history the resultant lifeworld in India converges like a drama and dance of space time function with transference and transformation In the passage of time emerged a metaphysical frame of thought the varieties of heritagescapes and simultaneously grown the senses to heritage ecology Of course attempts have been scanty but the richness always portrayed in literature and literary geography Historical and cultural geographies in India have not caught that much attention in the academia however on micro level distinct attributes are interpreted in the recent literature Going back to the ancient notions of nature theology religioscapes and rituals have developed a complex network of belief systems in the Hindu traditions In these traditions the motherly river Ganga serves as symbol system and metaphor in the Indian culture Continuity of cultural manifestations is actively maintained and continued in the Indian villages where lives three fourths of India's population and serve like a place ballet India's catastrophic march on the road of development and technology is entangled with obstacles and socio spatial gaps that need to be re considered in the light of cultural background and historical legacy All these issues are examined emphasising dualistic and complimentary perspectives in the West and the East Contents Viewpoints on the book v viii List of Tables List of Figures xi xvi Foreword Prof Martin J Haigh Oxford Brooke University UK 1 8 Preface Acknowledgements 9 21 1 Metaphysics and Sacred Ecology Cosmos Theos Anthropos 23 57 2 Lifeworld Lifecycle and Home 58 97 3 Landscape as Text Literary Geography and Indian Context 98 128 4 Historical Geography of India Trends in the 21st century 129 162 5 Cultural Geography of India Trends in the 21st century 163 195 6 Geographic Milieu and Belief Systems An Appraisal 196 226 7 Sacred space and Faithscape 227 266 8 The Ganga River Images and Symbol of India 267 302 9 Indian Village A Phenomenological Understanding 303 350 10 Heritagescapes of India Appraising Heritage ecology 351 393 and 11 Development in India Appraising Self Retrospection 394 422 index 423 430 author 431 **Australian Aboriginal Religion.
