Handbook of Governance in Small States Lino Briguglio, Jessica Byron, Stefano Moncada, Wouter Veenendaal, 2020-12-18 This volume covers a wide spectrum of governance issues relating to small states in a global context While different definitions of governance are given in the chapters most authors associate governance with the setting and implementation of policies aimed at managing a country or territory and with the related institutional structures and interventions by political actors Generally good governance is associated with concepts such as policy effectiveness accountability transparency control of corruption encouragement of citizens voice and gender equality factors which are in turn linked with democracy What emerges from the book is that the societies of small states are being re shaped by various forces outside their control including the globalization process and climate change rendering their governance ever more complex These problems are not solely faced by small states but small country size tends to lead to a higher degree of exposure to external factors The chapters are grouped into four sections broadly covering political environmental social and economic governance Governance is influenced by many often intertwined factors the division of the book into four parts therefore does not detract from the fact that governance is multifaceted and such division was based on the primary focus of each particular study and its main disciplinary background The expert authors have moreover used a variety of approaches in the studies the subject of small states being well suited to scholarly work from different disciplines using qualitative quantitative and mixed approaches to arrive at useful conclusions

Alloys Marin R. Sullivan, 2022-03-22 A new look at the interrelationship of architecture and sculpture during one of the richest periods of American modern design Alloys looks at a unique period of synergy and exchange in the postwar United States when sculpture profoundly shaped architecture and vice versa Leading architects such as Gordon Bunshaft and Eero

Saarinens turned to sculptors including Harry Bertoia Alexander Calder Richard Lippold and Isamu Noguchi to produce site determined large scale sculptures tailored for their buildings highly visible and well traversed threshold spaces The parameters of these spaces atriums lobbies plazas and entryways led to various designs like sculptural walls ceilings and screens that not only embraced new industrial materials and processes but also demonstrated arts ability to merge with lived architectural spaces Marin Sullivan argues that these sculptural commissions represent an alternate history of midcentury American art Rather than singular masterworks by lone geniuses some of the eras most notable spaces Philip Johnsons Four Seasons Restaurant in Mies van der Rohes Seagram Building Max Abramovitzs Philharmonic Hall at Lincoln Center and Pietro Belluschis and Walter Gropiuss Pan Am Building would be diminished without the collaborative efforts of architects and artists At the same time the artistic creations within these spaces could not exist anywhere else Sullivan shows that the principle of synergy provides an ideal framework to assess this pronounced relationship between sculpture and architecture She also explores the afterlives of these postwar commissions in the decades since their construction A fresh consideration of sculpture s relationship to architectural design and functionality following World War II Alloys highlights the affinities between the two fields and the ways their connections remain with us today *Contracts for Construction and Engineering Projects* Donald Charrett, 2021-12-22 *Contracts for Construction and Engineering Projects* provides unique and invaluable guidance on the role of contracts in construction and engineering projects The work explores various aspects of the intersection of contracts and construction projects involving the work of engineers and other professionals engaged in construction whether as project managers designers constructors contract administrators schedulers claims consultants forensic engineers or expert witnesses Compiling papers written and edited by the author refined and expanded with additional chapters in this new edition this book draws together a lifetime of lessons learned in these fields and covers the topics a practising professional might encounter in construction and engineering projects developed in bite sized chunks The chapters are divided into five key parts 1 The engineer and the contract 2 The project and the contract 3 Avoidance and resolution of disputes 4 Forensic engineers and expert witnesses and 5 International construction contracts The inclusion of numerous case studies to illustrate the importance of getting the contract right before it is entered into and the consequences that may ensue if this is not done makes this book essential reading for professionals practising in any area of design construction contract administration preparation of claims or expert evidence as well as construction lawyers who interact with construction professionals **Forthcoming Books** Rose Arny, 2001-08
