Voice Vision is a comprehensive manual for the independent filmmakers and film students who want a solid grounding in the tools techniques and processes of narrative film in order to achieve their artistic vision This book includes essential and detailed information on relevant film and digital video tools a thorough overview of the filmmaking stages and the aesthetic considerations for telling a visual story The ultimate goal of this book is to help you develop your creative voice while acquiring the solid practical skills and confidence to use it Unlike many books that privilege raw technical information or the line producing aspects of production *Voice Vision* places creativity visual expression and cinematic ideas front and center After all every practical decision a filmmaker makes like choosing a location an actor a film stock a focal length a lighting set up an edit point or a sound effect is also an expressive one and

should serve the filmmaker's vision. Every decision from the largest conceptual choices to the smallest practical solutions has a profound impact on what appears on the screen and how it moves an audience. In Practice sidebars throughout Voice Vision connect conceptual aesthetic and technical issues to their application in the real world. Some provide a brief analysis of a scene or technique from easily rentable films which illustrate how a specific technology or process is used to support a conceptual narrative or aesthetic choice. Others recount common production challenges encountered on real student and professional shoots which will inspire you to be innovative and resourceful when you are solving your own filmmaking challenges.
