Perren, Martin Allgöwer, 1991. The Manual of INTERNAL FIXATION is well known internationally as a standard work for every specialist dealing with osteosynthesis. Due to the many changes that have taken place, an international faculty of orthopaedic surgeons and traumatologists completely revised and expanded the manual. In its third edition, the manual reflects the state of the art and is the necessary reference for every AO specialist.

**Manual of Internal Fixation** W. Bandi, M. E. Müller, M. Allgöwer, 1970-01-01. *Manual of INTERNAL FIXATION* M.E. Müller, M. Allgöwer, R. Schneider, H. Willenegger, 2014-10-03. In the early 1950s the pioneering work of Robert Danis on operative treatment of fractures was in danger of falling into oblivion. Maurice E. Müller impressed and intrigued by his contacts with Danis first critically applied internal fixation and immediate mobilization to some 80 patients and found the basic concept confirmed but in need of further development with regard to technology, clinical application and scientific analysis. In 1958 he assembled a group of friends, general and orthopedic surgeons willing to invest time and effort in helping to create the necessary armamentarium and to form a study group for clinical trials. This group was set up in the same year under the name Arbeitsgemeinschaft für Osteosynthesefragen (AO) later on to be known in English speaking countries as the Association for the Study of Internal Fixation (ASIF). The first report on operative treatment of fractures by Müller, Allgöwer and Willenegger published in 1963 stressed the advantages of early open reduction and internal fixation. This book first published in German amusingly lost an important part when translated into English. At the suggestion of worried American and English partners a picture series showing the healing pattern of 188 tibial fractures operated on in Chur between December 20, 1961 and April 26, 1962 was left out. **AO Manual of Fracture Management** G.
