Brexit Geographies Mark Boyle, Ronan Paddison, Peter Shirlow, 2020-06-29 This comprehensive volume explores the political social economic and geographical implications of Brexit within the context of an already divided UK state It demonstrates how support for Brexit not only sharpened differences

**Children of the Dream** Rucker C. Johnson, 2019-04-16 An acclaimed economist reveals that school integration efforts in the 1970s and 1980s were overwhelmingly successful and argues that we must renew our commitment to integration for the sake of all Americans We are frequently told that school integration was a social experiment doomed from the start But as Rucker C Johnson demonstrates in *Children of the Dream* it was in fact a spectacular achievement Drawing on longitudinal studies going back to the 1960s he shows that students who attended integrated and well funded schools were more successful in life than those who did not and this held true for children of all races Yet as a society we have given up on integration Since the high point of integration in 1988 we have regressed and segregation again prevails Contending that integrated well funded schools are the primary engine of social mobility *Children of the Dream* offers a radical new take on social policy It is essential reading in our divided times

*German-American Relations in the 21st Century* Klaus Larres, Ruth Wittlinger, 2020-04-22 German American relations have become interesting again U S President Donald Trump s lukewarm policy toward Europe has ensured that the relationship between Berlin and Washington is once again regarded as an important field of scholarship within global politics And yet it was only a few years ago that German American relations seemed to take second place to transatlantic relations in general and the European Union EU USA relationship in particular The advent of Donald Trump as US President in January 2017 has made all the difference Trump s difficult personal relationship with German Chancellor Angela Merkel and his denigration of everything the Western world including the USA itself has stood for since 1949 have given a new significance to German American relations in practice and theory This volume offers an empirical and conceptual analysis of German American relations in the 21st century and highlights the serious and perhaps unprecedented challenges the two countries face at present The authors discuss a number of aspects of the current much more fragile state of German American relations from different perspectives This book was originally

published as a special issue of the journal German Politics      **Banking's Final Exam** Morris Goldstein, 2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009 stress testing of large financial institutions has become the cornerstone of banking supervision worldwide The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable In Banking's Final Exam one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses leading to a false sense of reassurance about the safety and soundness of the banking system Some weaknesses can be corrected within the existing bank capital regime but others will require bold reforms including higher minimum capital requirements for the largest and most systemically important banks The banking industry is likely to resist these reforms but this book explains why their objections do not hold water      **Network neutrality** Christopher T. Marsden, 2017-02-23 This electronic version has been made available under a Creative Commons BY-NC open access license Net neutrality is the most contested Internet access policy of our time This book offers an in-depth explanation of the concept addressing its history since 1999 its engineering the policy challenges it represents and its legislation and regulation Various case studies are presented including Specialized Services and Content Delivery Networks for video over the Internet and the book goes on to examine the future of net neutrality battles in Europe the United States and developing countries as well as offering co-regulatory solutions based on FRAND and non-exclusivity It will be a must-read for researchers and advocates in the net neutrality debate as well as those interested in the context of communications regulation law and economic regulation human rights discourse and policy and the impact of science and engineering on policy and governance      Urban Landscapes in High-Density Cities Bianca Maria Rinaldi, Puay Yok Tan, 2019-06-04 The positive effects of urban green spaces are well known ranging from the promotion of health support of biodiversity to climate regulation However the practical implementation of urban landscapes is less discussed How can we make these spaces functional economically feasible and inclusive especially as cities become more diverse The publication explores strategies to reconcile the various demands such as food production resilience and nature conservation Indeed urban landscapes have to be restorative ecological and aesthetically pleasing at the same time This is a particular challenge in high density cities like Singapore Seoul or New York where space is a scarce commodity The continuing growth of the worldwide urban population imbues the topic with a special urgency      China's International Transboundary Rivers Lei Xie, Jia Shaofeng, 2017-12-06 China has forty major transboundary watercourses with neighbouring countries and has frequently been accused of harming its downstream neighbours through its domestic water management policies such as the construction of dams for hydropower This book provides an understanding of water security in Asia by investigating how shared water resources affect China's relationships with neighbouring countries in South East Southeast and Central Asia Since China is an upstream state on most of its shared transboundary rivers the country's international water policy is at the

core of Asia's water security. These water disputes have had strong implications for China's interstate relations and also influenced its international water policy alongside domestic concerns over water resource management. This book investigates China's policy responses to domestic water crises and examines China's international water policy as well as its strategy in dealing with international cooperation. The authors describe the key elements of water diplomacy in Asia which demonstrate varying degrees of effectiveness of environmental agreements. It shows how China has established various institutional arrangements with neighbouring countries primarily in the form of bilateral agreements over hydrological data exchange. Detailed case studies are included of the Mekong, Brahmaputra, Ili and Amur rivers.

**European Disintegration?** Douglas Webber, 2018-11-20. This new book provides a comprehensive analysis of Europe on the brink of political disintegration. Observers of the European Union (EU) could be forgiven for thinking that it is in a state of permanent crisis. The Union has been beset with high levels of Eurozone debt, Russian intervention and armed conflict in Ukraine, refugees fleeing conflict zones in North Africa and the Middle East, and the decision of Britain to leave the European Union. This text offers a concise and readable assessment of the dynamics, character and consequences of these four crises and the increasingly real possibility of European disintegration. High levels of socio-economic interdependence and institutionalization have failed to result in an ever closer union and yet the proposed theories of disintegration also fall short. Webber instead shows that it is only by looking at the role of the EU's dominant member, Germany, in each crisis that the potential for an increasingly fragmented Europe becomes clear. Until now, Germany has been the EU's stabilizing force, but this is no longer guaranteed. The fate of the integration process will depend on whether other, more inclusive forms of stabilizing leadership may emerge to fill the vacuum created by Berlin's incapacity. This text is the ideal companion for upper undergraduate and postgraduate students of the European Union as part of degrees in politics, international relations or European studies, or for anyone interested in the crises of the European Union.

*Legal Geographies of Water* Cristy Clark, 2025-06-30. This book deepens our understanding of humanity's diverse relationships with water and the law, providing a critical assessment of this relationship and charting the course towards a more sustainable and just water future. By using legal geography, this book pays particular attention to the place

based inter relationships between water people and law both formal and informal and to the ways that law both constitutes and is constituted by the relationship between people and place Starting in the 1980s Chapter 2 investigates the early commodification of water through the liberalisation of rural water markets in Chile and the urban water supply and sanitation systems of England and Wales Chapter 3 then examines the global expansion of neoliberal water governance in the 1990s starting with donor driven reforms in the global south and particularly Manila in the Philippines Chapters 4 and 5 document both the grassroots response to these neoliberal water reforms and the inherent tensions in the attempts of the early 2000s to reconcile the recognition of a human right to water with the ongoing rollout of market mechanisms both in the domestic context of South Africa and within the United Nations human rights system Moving forward again Chapter 6 examines the recent intensification of neoliberal water governance through financialisation and considers its specific impacts in Detroit and Flint Michigan Chapter 7 then considers the renewed global emphasis on living waters and Indigenous ontologies of water by examining the new legislative arrangements for the Whanganui River in Aotearoa New Zealand The book concludes in Chapter 8 by highlighting the stories of hope that can be found in many of the case studies explored in the book and in emerging examples from around the world This book is essential reading for students and scholars interested in water law security and justice from across a wide range of disciplines including environmental studies law geography human rights and political ecology
