

# MANOVA And Repeated Measures ANOVA Compared

These notes are developed from "Approaching Multivariate Analysis: A Practical Introduction" by Pat Dugard, John Todman and Harry Staines.

We now consider the situation in which there is a between-subject independent variable, a within subject independent variable and only one dependent variable, as the design is initially conceived. It may be possible to conceptualise levels of the within-subject independent variable as comprising different measures (i.e. dependent variables). In this situation, it is possible to carry out a between-subjects MANOVA instead of a mixed (one between, one within) factorial ANOVA.
