Collapse, Volume 1 Robin Mackay, 2019-01-15 An investigation of the nature and philosophical uses of number The first volume of Collapse investigates the nature and philosophical uses of number The volume includes an interview with Alain Badiou on the relation between philosophy mathematics and science an in depth interview with mathematician Matthew Watkins on the strange connections between physics and the distribution of prime numbers and contributions that demonstrate the many ways in which number intersects with philosophical thought from the mathematics of intensity to terrorism from occultism to information theory and graphical works of multiplicity *The Neurotic Turn* Charles Johns, 2017-11-16 Taking their cue from the work of Charles Johns who has argued that far from being an ailment neurosis is in fact the dominant condition of our society today an array of thinkers have gathered in The Neurotic Turn to address the question what can neurosis tell us about our current social impasse What emerges in The Neurotic Turn is the awareness that the medicalization of neurosis was merely provisional Today to understand our increasingly synthetic digitized world we cannot retreat from neurosis or pretend to offer its cure Instead we must confront it dispensing with the conventional idea of reality in order to redefine it Superpositions Rocco Gangle, Julius Greve, 2017-05-24 One of the most important French philosophers working today Fran ois Laruelle has developed an innovative and powerful repertoire of concepts across an oeuvre spanning four decades and more than twenty books His work termed non philosophy or more recently non standard philosophy has garnered international attention in recent years and stands likely to have a significant impact on the critical practices of the humanities in the near future Bringing together some of the most prominent scholars of Laruelle *Superpositions Laruelle and the Humanities* explores the intersections of Laruelle s work with multiple discourses within the humanities including philosophy critical theory political theory media studies and religious studies The book addresses two main questions In what relation does non philosophical thought stand with respect to the materials and methods of other disciplines How can Laruelle s non standard philosophy be applied appropriated and used by other discourses *Superpositions* provides a useful introduction to Laruelle s work for students and scholars and marks an important intervention into one of the most vigorous and contested areas of contemporary scholarship in the critical humanities **A Critique of Western Buddhism** Glenn Wallis, 2018-09-06 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched What are we to make of Western Buddhism Glenn Wallis argues that in aligning their tradition with the contemporary wellness industry Western Buddhists evade the consequences of Buddhist thought This book shows that with concepts such as vanishing nihility extinction contingency and no self Buddhism like all potent systems of thought articulates a notion of the real Raw unflinching acceptance of this real is held by Buddhism to be at the very core of human awakening Yet these preeminent human truths are universally shored up against in contemporary Buddhist practice contravening the very heart of Buddhism The author s critique of Western Buddhism is threefold It is immanent in emerging

out of Buddhist thought but taking it beyond what it itself publicly concedes negative in employing the democratizing deconstructive methods of François Laruelle's non philosophy and re-descriptive in applying Laruelle's concept of philofiction Through applying resources of Continental philosophy to Western Buddhism A Critique of Western Buddhism suggests a possible practice for our time an anthropotechnic or religion transposed from its seductive but misleading idealist haven

thinkers who courageously traverse disciplinary boundaries What brings them together is the least stratified component a shared problem It is a widely recognised that a problem gets the solution it merits However only a few acknowledge that a problem seldom neatly fits within a single discipline nor does it conform to the principle of general equivalence Handling its irreducibility and non entailment is a skill possessed by very few Even fewer take the quasi causal capacity of what we term the space of technicity seriously The space of technicity the shared problem of this volume is a consequence of immanence Each configuration of surfaces comprising the built environment produces an intangible effect acting as a quasi cause It can be referred to as downward causation or the timely rediscovery of neo finalism In this volume it is approached it from the perspective of axiology The space of technicity allows us to evade techno determinism without adopting an anything goes attitude That which has become manifest could have individuated differently However the potential of a body cannot be discerned before intervening in the causal fabric of agential reality to extract the singular points that make certain outcomes more likely than others surpassing mere probability When operating within the ethico aesthetic paradigm where sense becomes intricately dependent on sensibility and vice versa the volume s attitude might be said to approximate the Spinozian third kind of knowledge that intuits design and its space of technicity beyond mere imagination or reason This edited volume was inspired by a virtual round table that exhibited a high degree of resonance among the participants www.youtube.com/watch?v=cBiBAGxC5FM

Parenting/Internet/Kids: Domesticating Technologies Fiona Joy Green,Jaqueline McLeod Rogers,2022-07-07 Parenting Internet Kids with three key terms slashed together conveys the idea that the practice of parenting may extend both to the Internet and to our children to the extent that both require attention care and forms of regulation and in turn provide support and enjoyment While the triadic title is somewhat playful it also strikes a serious note and introduces layered possibilities we are not simply raising children who have grown up in the internet age but also Domesticating Technologies by managing the computer relatively young in age too having established itself in homes in the 1980s Including perspectives from scholars and parents living in Australia Canada India Japan the UK and the USA the collection examines how the intimate presence of computer technology in our homes and on our bodies affects not only mothers and parenting but family life more broadly

Radio und Schizophrenie Ferdinand Klüsener, 2024-12-14 In diesem Buch wird eine umfassende Radiotheorie der Schizoanalyse formuliert die auf wenig erforschten Texten Praktiken und Archivmaterial basiert Im Mittelpunkt steht die Relevanz der Schizoanalyse für den ästhetischen Diskurs des 20. Jahrhunderts insbesondere im Kontext der Radiokunst Der Autor untersucht die Positionierung dieser Theorie zwischen Theater und Medienwissenschaften und analysiert deren Beziehung zur Geschichte und Ästhetik des Radios Durch die Verbindung des mikropolitischen Gestenbegriffs von Deleuze und Guattari mit Konzepten des Gestischen aus dem Lehrstück und deren Verortung in einer Phänomenologie der Zeit jenseits des Tragischen wird ein neuer theoretischer Rahmen geschaffen Zudem werden bisher unbekannte auditive Objekte für die Historisierung und Kanonisierung der Radiotheorie entdeckt Methodisch stützt sich die Arbeit auf Performanceanalyse Medienarchologie und Interviews mit Akteuren des Feldes Das Buch leistet einen entscheidenden Beitrag zur Erforschung eines weitgehend unerforschten aber zentral historisch relevanten Themas und definiert neue theoretische Konzepte für Theorie und Praxis

Duchamp, Aesthetics and Capitalism

Julian Jason Haladyn, 2019-07-12 This book is a significant rethinking of Duchamp's importance in the twenty first century taking seriously the readymade as a critical exploration of object oriented relations under the conditions of consumer capitalism The readymade is understood as an act of accelerating art as a discourse of pushing to the point of excess the philosophical precepts of modern aesthetics on which the notion of art in modernity is based Julian Haladyn argues for an accelerated Duchamp that speaks to a contemporary condition of art within our era of globalized capitalist production
