

The Answer is A

To answer this question, just search for the key words and identify the appropriate section of the NCEES ref manual. In this case, the key word is "particle rectilinear motion". Then one can find the corresponding equation in Page T2 to solve this problem.

• Particle Rectilinear Motion

Variable a

$$a = \frac{dv}{dt}$$

$$v = \frac{dx}{dt}$$

$$a \, dt = v \, dv$$

Constant $a = a_0$

$$v = v_0 + a_0 t$$

$$x = x_0 + v_0 t + \frac{1}{2} a_0 t^2$$

$$v^2 = v_0^2 + 2a_0(x - x_0)$$

$$v = v_0 + at = 0 + 9.8 \times 10 = 98 \text{ m/s}$$

Miranda,2012-12-06 In the theory of partial differential equations the study of elliptic equations occupies a preeminent position both because of the importance which it assumes for various questions in mathematical physics and because of the completeness of the results obtained up to the present time In spite of this even in the more classical treatises on analysis the theory of elliptic equations has been considered and illustrated only from particular points of view while the only expositions

of the whole theory the extremely valuable ones by LICHTENSTEIN and Ascoli have the character of encyclopedia articles and date back to many years ago Consequently it seemed to me that it would be of some interest to try to give an up to date picture of the present state of research in this area in a monograph which without attaining the dimensions of a treatise would nevertheless be sufficiently extensive to allow the exposition in some cases in summary form of the various techniques used in the study of these equations
