### Abstract

Enterprise is an important element of government strategy to increase productivity and support the creation and maintenance of a healthy economic climate. Whilst there has been lively debate about best ways of embedding entrepreneurship into the engineering curriculum, so far no definitive approach has emerged.

Conscious of the importance of the enterprise agenda in higher education, the Department of Mechanical Engineering at Sheffield University aims to remain at the forefront of the competition by meeting customer expectations and fulfilling their needs. We have therefore made a concerted effort to increase students' entrepreneurial and intrapreneurial potential over the past three years. Consequently, several modules and degree programmes have been created specifically to meet these needs.

This case study presents two modules as representative examples of how mechanical engineers are gaining an insight into the entrepreneurial world.

### Background and key features of the modules

#### 1 Enterprise and Technology

Module size	Single
Open / restricted	Restricted
Core/Option	Core
Availability on/off campus	On campus
Total student study hours	100
Number of weeks	10 weeks

This module was designed with the main objective of encouraging first year students to think of themselves as potential entrepreneurs, not to be afraid of the word 'enterprise', and to think of enterprise as a route to commercialise their engineering skills. Additionally, the module was developed in a rather unconventional way, whereby students would receive the knowledge through quotes and analogies and then reflect on the knowledge acquired through group dynamics.

#### 2 Business Planning

Module size	Single
Open / restricted	Restricted
Core/Option	Option
Availability on/off campus	On campus
Total student study hours	100
Number of weeks	10 weeks

This highly innovative business planning module uses a "reality teaching and learning" approach. Students are given a real commercial problem provided by real customers. They are asked to apply their engineering knowledge to solve the problem and write a financially and commercially viable business plan for it. They receive just 10% to 15% traditional lecturing. The remainder is based on case studies and workshops, and presentations from relevant speakers such as bankers, customers, intellectual property consultants and real

**Business Plan** Carl J. Schramm, 2018-01-18 How would you like to get business startup advice straight from the man who co founded Global Entrepreneurship Week and StartUp America. Well now you can. Carl Schramm the man described by The Economist as The Evangelist of Entrepreneurship has written a myth busting guide packed with tools and techniques to help you get your big idea off the ground. Carl believes that entrepreneurship has been completely misrepresented by the media business books university programmes and MBA courses. He believes that the perception of what it takes to start a business no longer matches the reality which is bad news for everyone because it stops great ideas coming to life. Burn the Business Plan punctures the myth of the cool tech savvy 20 something entrepreneur with nothing to lose and venture capital to burn showing that most people who start businesses are juggling careers and mortgages just like you. Burn the Business Plan is written to encourage you to get started. It demystifies the entrepreneurial process portrayed on television shows like Dragon's Den. It doesn't rely on largely irrelevant stories of overvalued tech startups nor does it build on the largely mistaken narrative of a linear path from cold start to great success that is the essence of business planning as taught in universities. This is the guide to starting and running a business that will actually work for the rest of us. Burn the Business Plan is for regular people who just want practical real world advice on how to start and run a successful business. It shows you how to avoid the common mistakes and what you need to do to put your enterprise on track for success. **The FT Essential**
