The Indian Nitrogen Assessment Yash P. Abrol, Tapan K. Adhya, Viney P. Aneja, N. Raghuram, Himanshu Pathak, Umesh Kulshrestha, Chhemendra Sharma, Bijay Singh, 2017-08-14 The Indian Nitrogen Assessment Sources of Reactive Nitrogen Environmental and Climate Effects and Management Options and Policies provides a reference for anyone interested in Reactive N from researchers and students to environmental managers Although the main processes that affect the N cycle are well known this book is focused on the causes and effects of disruption in the N cycle specifically in India The book helps readers gain a precise understanding of the scale of nitrogen use misuse and release through various agricultural industrial vehicular and other activities also including discussions on its contribution to the pollution of water and air Drawing upon the collective work of the Indian Nitrogen Group this reference book helps solve the challenges associated with providing reliable estimates of nitrogen transfers within different ecosystems also presenting the next steps that should be taken in the development of balanced cost effective and feasible strategies to reduce the amount of reactive nitrogen Identifies all significant sources of reactive nitrogen flows and their contribution to the nitrogen cycle on a national regional and global level Covers nitrogen management across sectors including the environment food security energy and health Provides a single reference on reactive nitrogen in India to help in a number of activities including the evaluation analysis synthesis documentation and communications on reactive nitrogen

**Soil and Fertilizers** Rattan Lal, 2020-05-06 Soil and Fertilizers Managing the Environmental Footprint presents strategies to improve soil health by reducing the rate of fertilizer input while maintaining high agronomic yields It is estimated that fertilizer use supported nearly half of global births in 2008 In a context of potential food insecurity exacerbated by population growth and climate change the importance of fertilizers in sustaining the agronomic production is clear However excessive use of chemical fertilizers poses serious risks both to the environment and to human health Highlighting a tenfold increase in global fertilizer consumption between 2002 and 2016 the book explains the effects on the quality of soil water air and biota from overuse of chemical fertilizers Written by an interdisciplinary author team this book presents methods for enhancing the efficiency of fertilizer use and outlines agricultural practices that can reduce the environmental footprint Features Includes a thorough literature review on the agronomic and environmental impact of fertilizer from degradation of ecosystems to the eutrophication of drinking water Devotes specific chapters to enhancing the use efficiency and effectiveness of the fertilizers through improved formulations time and mode of application and the use of precision farming technology Reveals geographic variation in fertilizer consumption volume by presenting case studies for specific countries and regions including India and Africa Discusses the pros and cons of organic vs chemical fertilizers innovative technologies including nuclear energy and the U N s Sustainable Development Goals Part of the Advances in Soil Sciences series this solutions focused volume will appeal to soil scientists environmental scientists and agricultural engineers

**Good agricultural practices (GAP)** Food and Agriculture

Organization of the United Nations,2023-11-02 Rice plays an important role in Myanmar s agricultural economy livelihoods and food security The country possesses favourable conditions to enhance rice productivity quality and export opportunities across the value chain Achieving this involves improving farm level productivity processing practices and overall rice competitiveness Effective strategies include adopting and expanding good agricultural practices GAP to enhance food safety and quality Gaps in knowledge access and efficiency of inputs and services for rice were identified through a comprehensive GAP situational analysis Validation was achieved through research discussions with market actors and stakeholders as well as insights from FAO experts and extensive data research The objective of GAP dissemination involves a systematic impact oriented approach with stakeholder involvement Context specific information will be collected at the farmer s field Capacity building efforts involve lead farmer organizations public private partners and value chain actors The framework contains pre and post harvest practices tailored for small and medium farmers supported by farmer organizations sensitization technical assistance and market linkages On farm demonstrations farmer field schools training and information and communications technology ICT tools supplement GAP promotion User friendly integrated pest management IPM handbooks and Farmer Field School FFS curricula complement the framework guiding capacity building efforts for farmers and GAP stakeholders to support and complement existing initiatives

*International Conference on Frontiers of Energy, Environmental Materials and Civil Engineering (FEEMCE 2013)* Roger D. W. Zheng,2013-12-26 The main objective of FEEMCE 2013 is to provide a platform for researchers engineers academicians as well as industrial professionals from all over the world to present their research results and development activities in Energy Environmental Materials and Civil Engineering This conference provides opportunities for the delegates to exchange new ideas and experiences face to face to establish business or research relations and to find global partners for future collaboration

*Integrated Plant Nutrition Systems* Raoul Dudal,R. N. Roy,1995-01-01 This publication is structured on the main themes of the consultation the importance of plant nutrition for meeting agricultural product requirements soil organic matter biomass soil microflora and management of integrated plant nutrition systems renewable supply of plant nutrients from natural sources and plant nutrient transfer to crops the place and role of local and external sources of plant nutrients in cropping systems and their evaluation plant nutrient management in farming systems and in watersheds and territories and priorities for FAO s Integrated Plant Nutrition Systems IPNS programme

**Tropentag 2017** Eric Tielkes,2017-08-28 Tropentag is an annual international conference on food security natural resource management and rural development Tropentag 2017 is organised by the University of Bonn Germany jointly with the Council for Tropical and Subtropical Research ATSAF e V in cooperation with the GIZ Advisory Service on Agricultural Research for Development BEAF This year s Conference theme is Future Agriculture social ecological transitions and bio cultural shifts Future agriculture is by definition an emerging phenomenon It is continuously in the making while present visions of the future turn into history Vast stretches of land in developing countries are being put to new uses with

new forms of governance new ownership patterns and new forms of production Particularly agricultural systems are undergoing drastic changes unfolding an enormous transformative power and affecting millions of people System immanent attributes such as visions aspirations cultural specifics and production factor availability shape the response of land users to growing external pressures such as climate change market demands land degradation emerging diseases and policies In addition to such social ecological transitions substantial bio cultural shifts occur and are imposed by centrally planned establishments of large scale intensification or conservation corridors and protection zones or are associated with infrastructure development and urbanisation processes A wide array of resulting response pathways and land use or production strategies emerge that may be beneficial for rural and urban populations but can also lead to abandonment of land migration and conflicts

Recarbonizing global soils – A technical manual of recommended management practices  
Food and Agriculture Organization of the United Nations, Intergovernmental Technical Panel on Soils, 2021-09-08 During the last decades soil organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15 Protect restore and promote sustainable use of terrestrial ecosystems sustainably manage forests combat desertification and halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1 This technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments including the advantages drawbacks and constraints This manual presents different sustainable soil management SSM practices at different scales and in different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications Volume 5 includes 24 practices that have a direct impact on SOC sequestration and maintenance in forestry wetlands and urban soils

**Methane Emissions from Major Rice Ecosystems in Asia** Reiner Wassmann, Rhoda S. Lantin, Heinz-Ulrich Neue, 2012-12-06 Rice production is affected by changing climate conditions and has the dual role of contributing to global warming through emissions of the greenhouse gas methane Climate change has been recognized as a major threat to the global environment Because of insufficient field data rice growing countries face a problem when trying to comply with the United Nations Framework Convention on Climate Change stipulations to compile a national inventory of emissions and to explore mitigation options Given the expected doubling in rice production in Asia the need to evaluate the interaction between climate change and rice production is critical to forming a sound basis for future directions of technology developments by policy makers agriculturists environmentalists rice producers and rice consumers The present book comprises two sections The first part documents a comprehensive overview of the results achieved from an interregional research effort to quantify methane

emission from major rice ecosystems and to identify efficient mitigation options This research report broadens understanding of the contribution of rice cultivation to methane emissions and clarifies that emissions are relatively low except in specific rice ecosystems and that these high emissions could be ameliorated without sacrificing yield The second section shows results from other projects that investigated the role of rice cultivators in field and laboratory approaches The findings represent inputs for future modeling approaches in the role of rice cultivators The expanded database generated by other projects is reflected in modeling efforts Handbook of Plant Nutrition Allen V. Barker, David J. Pilbeam, 2016-04-19 The burgeoning demand on the world food supply coupled with concern over the use of chemical fertilizers has led to an accelerated interest in the practice of precision agriculture This practice involves the careful control and monitoring of plant nutrition to maximize the rate of growth and yield of crops as well as their nutritional value **Organic Matter and Rice**, 1984 **Input Use Efficiency for Food and Environmental Security** Rajan Bhatt, Ram Swaroop Meena, Akbar Hossain, 2022-01-11 Ending hunger achieving food security and promoting sustainable development are at the top of the list of United Nations UN sustainable global development priorities In the times of high population growth and increasing pressure of agricultural systems efficiency in use of natural resources has been at the epicenter of sustainable agricultural The concept of Input efficiency implies production of high quantity and quality of food from using only finite natural resources as inputs in the form of mainly land water nutrients energy or biological diversity In this book editors provide a roadmap to the food nutritional and environmental security in the agricultural systems They share insight into the approaches that can be put in practice for increasing the input use efficiency in the cropping systems and achieve stability and sustainability of agricultural production systems This book is of interest to teachers researchers climate change scientists capacity builders and policymakers Also the book serves as additional reading material for undergraduate and graduate students of agriculture agroforestry agroecology and environmental sciences National and international agricultural scientists policymakers will also find this to be a useful read Advances in Agronomy, 2008-06-20 Advances in Agronomy continues to be recognized as a leading reference and a first rate source for the latest research in agronomy As always the subjects covered are varied and exemplary of the myriad of subject matter dealt with by this long running serial Maintains the highest impact factor among serial publications in agriculture Presents timely reviews on important agronomy issues Enjoys a long standing reputation for excellence in the field **Remote Sensing of Agriculture and Land Cover/Land Use Changes in South and Southeast Asian Countries** Krishna Prasad Vadrevu, Thuy Le Toan, Shibendu Shankar Ray, Chris Justice, 2022-03-28 This book sheds new light on the remote sensing of agriculture in South Southeast Asian S SEA countries S SEA countries are growing rapidly in terms of population industrialization and urbanization One of the critical challenges in the region is food security In S SEA although total food production and productivity have increased in previous decades in recent years the growth rate of food production has slowed down mostly due to land use change

market forces and policy interventions Further the weather and climate systems in the region driven primarily by monsoon variability are resulting in droughts or flooding impacting agricultural production Therefore monitoring crops including agricultural land cover changes at regular intervals is essential to predict and prepare for disruptions in the food supply in the S SEA countries The current book captures the latest research on the remote sensing of agricultural land cover land use changes including mapping and monitoring crops crop yields biophysical parameter retrievals multi source data fusion for agricultural applications and chapters on decision making and early warning systems for food security The authors of this book are international experts in the field and their contributions highlight the use of remote sensing and geospatial technologies for agricultural research and applications in South Southeast Asia Agroecosystems of South India K. R. Krishna, 2010 Agroecosystems of South India is a unique treatise that deals with the relevance of natural resources genetic stocks fertilizers and agronomic practices on the productivity of agroecoregions Within the context of this book an agroecosystem has been defined as a conglomerate of small cropping zones which may be mono cropping expanses or intercrops that occur in various geographic regions of South India South India abounds with several such agroecosystems that encompass field crops vegetables cash crops plantations and forest species However the main emphasis within this volume is restricted to agroecosystems that include major cereals legumes and oil seed crops There are 10 chapters in this volume The first on historical aspects traces important events related to domestication introduction of crop species agricultural implements development of soil fertility and crop husbandry procedures An introductory chapter on Agroecosystems delineates various agroecoregions of South India Their classification based on physiography soils and climatic parameters have been dealt with in great detail Descriptions on natural resources such as soils and their fertility conditions water resources climatic conditions including precipitation patterns and crops and their genotypes are available in chapter 2 The impact of soil fertility and nutrient dynamics on ecosystematic functions and productivity of crops in an agroecosystem forms the central piece of discussions within chapters 3 to 9 Historical background geographical settings agroclimate soils cropping systems and productivity trends have been provided for each cropping ecosystem Recent advances and details on aspects of nutrient dynamics such as soil nutrients their availability physico chemical transformations nutrient fluxes inorganic fertilizer supply organic manures crop residue recycling nutrient carry over and nutrient balances imbalances form the core of each chapter The impact of beneficial soil microbes such as Rhizobium Plant Growth Promoting Rhizobacteria and Arbuscular Mycorrhizas on nutrient dynamics in soil has also been discussed More recent developments dealing with modeling nutrients in cropping ecosystems computer based simulations precision farming and site specific nutrient management have been emphasized Forecasts on the impact of nutrient dynamics on the future course of agroecosystems are also available Overall this book is a scholarly edition that aims at providing an excellent exposition of recent developments within various agroecosystems of South India to a global audience It highlights the

importance of soil fertility and nutrient dynamics within agroecosystems to total food grain and fodder production in South India It will be a useful book to researchers professors and students dealing with agriculture environmental science ecology and plant science *Wassmann: Methane Emissions from PA*. **Nutrient Management Systems for Plant Nutrition: Optimization, Profitability, and Ecosystem Assessment** Henry Yabbey Sintim, Khurram Shahzad, Xinhua Yin Yin, 2025-03-25 Proper nutrient management is essential for optimizing plant growth and productivity while minimizing environmental impact Traditional nutrient management practices often rely on fixed application rates as determined from soil test analyses and other non plant based factors without considering the dynamic nutrient requirements of plants Adaptive nutrient management systems aim to address this issue by integrating precision agriculture data driven approaches and advanced technologies to optimize nutrient application strategies These systems take into account factors such as in season soil and crop conditions as well as other environmental variables to tailor nutrient inputs for increased plant productivity reduced nutrient losses and maximum economic profitability Effects of Soil Fertility Management Practices on Nutrient Availability and Yield of Rice in Myanmar Soe Soe Thein, 2004 Paddy Straw Waste for Biorefinery Applications Neha Srivastava, Bhawna Verma, P. K. Mishra, 2024-01-08 This book provides an exclusive and critical in depth analysis of paddy straw waste valorization at a broad scale for different industrial applications It explores and discusses the various valorization pathways of paddy straw into valuable products connected to biorefineries products and byproducts The book also examines the scope potential and availability of paddy straw in the field of biorefineries Various lignocellulosic biomasses with expanded potential are known for their industrial applications even at a broad pilot range Among these biomasses paddy straw has emerged as the most suitable lignocellulosic waste for various biorefinery applications Paddy is a crucial and widely consumed crop globally and it generates the highest annual production of waste compared to other cereal crops The cellulose content accounting for approximately 47% of the total cellulosic biomass offers significant potential for valorization along with hemicellulose and lignin which can also be explored and expanded on an industrial scale However despite the tremendous scope for valorization lignocellulosic biomass based biorefineries face cost effectiveness challenges that need to be addressed for sustainable and uniform expansion distribution and economic scalability in various applications The book s specific feature lies in its targeted and specific valorization of paddy straw into biofuels and other biorefinery based products which hold promising industrial applications and easily scalable approaches for mass production This book is an essential resource for students scientists engineers and practitioners working in the biorefinery industry and academia Microbial Inoculants Ajay Kumar, Joginder Singh Panwar, Ana Maria Queijeiro López, Ravindra N Kharwar, 2025-05-23 Microbial Inoculants Soil Dynamics and Nutrient Bioavailability is an essential volume in the Plant and Soil Microbiome series This book delves into the foundational and contemporary details regarding the use of microbial inoculants which are living organisms like fungi bacteria and microalgae

sourced from soil plants water and organic materials Acting as biostimulants or biocontrol agents these inoculants offer an environmentally friendly alternative to synthetic fertilizers and pesticides playing a crucial role in soil conservation plant health and crop yield enhancement Apart from exploring the nexus between plant and soil the book also discusses the range of applications of microbial inoculants in agricultural and environmental practices It provides insights into how these microorganisms contribute to sustainable farming by enhancing nutrient bioavailability and protecting crops from diseases thus promoting better yield and overall plant vitality This volume is a valuable resource for those interested in advancing agricultural techniques through the utilization of natural biotic solutions Includes perspectives from soil and plant nutrient impact Presents developments in dynamic network modeling including new experimental designs and techniques Emphasizes the diverse function of plant associated microbiomes

**Hydraulic Conductivity** Lakshmanan Elango, 2011-11-23 There are several books on broad aspects of hydrogeology groundwater hydrology and geohydrology which do not discuss in detail on the intrigues of hydraulic conductivity elaborately However this book on Hydraulic Conductivity presents comprehensive reviews of new measurements and numerical techniques for estimating hydraulic conductivity This is achieved by the chapters written by various experts in this field of research into a number of clustered themes covering different aspects of hydraulic conductivity The sections in the book are Hydraulic conductivity and its importance Hydraulic conductivity and plant systems Determination by mathematical and laboratory methods Determination by field techniques and Modelling and hydraulic conductivity Each of these sections of the book includes chapters highlighting the salient aspects and most of these chapters explain the facts with the help of some case studies Thus this book has a good mix of chapters dealing with various and vital aspects of hydraulic conductivity from various authors of different countries
