Coinage in the Northumbrian Landscape and Economy, C.575-c.867 Tony Abramson, 2018 This book presents the author's digitization of Pirie's corpus of 9th century Northumbrian styca's This database enhanced by data from elsewhere is compared by location with the artefactual database known as VASLE created at the University of York 2008 to demonstrate that the co-occurrence of coins and portable artefacts defines monetary evolution in Northumbria Additionally the author presents a new periodization and reveals the previously disparaged gold shillings of York to have been issued by Bishop Paulinus a disruptive finding chronologically with wider consequences Northumbria benefited increasingly both monetarily and fiscally as the face value of coins fell Other conclusions include the idea that Northumbrian coin production was erratic that the Yorkshire Wolds were more highly monetized than the surrounding lowlands indicating a more enterprising culture that styca hoards represent episcopal expropriations and that there were significant changes in settlement and economy in the central lowlands This work demonstrates that monetization reflected northern independence innovation and enterprise Back cover page 4 of cover

Consilience, Truth and the Mind of God Richard J. Di Rocco,2018-12-17 This book argues that God can be found within the edifice of the scientific understanding of physics cosmology biology and philosophy It is a rewarding read that asks the Big Questions which humans have pondered since the dawn of the modern human mind including Why and how does the universe exist From where do the laws of physics come How did life and mind arise from inanimate matter on Earth Science and religion have a common interest in the answers to such questions yet many scientists and believers have been at odds for centuries The author and contributors present a program for moving beyond the vastly different perspectives of reality offered by science and religion Historical proofs for the existence of God are considered in light of the possibility that the

and Celestial Myth in 'Beowulf' Edward Pettit, 2020-01-14 The image of a giant sword melting stands at the structural and thematic heart of the Old English heroic poem Beowulf This meticulously researched book investigates the nature and significance of this golden hilted weapon and its likely relatives within Beowulf and beyond drawing on the fields of Old English and Old Norse language and literature liturgy archaeology astronomy folklore and comparative mythology In Part I

Pettit explores the complex of connotations surrounding this image from icicles to candles and crosses by examining a range of medieval sources and argues that the giant sword may function as a visual motif in which pre Christian Germanic concepts and prominent Christian symbols coalesce In Part II Pettit investigates the broader Germanic background to this image especially in relation to the god Ing Yngvi Freyr and explores the capacity of myths to recur and endure across time Drawing on an eclectic range of narrative and linguistic evidence from Northern European texts and on archaeological discoveries Pettit suggests that the image of the giant sword and the characters and events associated with it may reflect an elemental struggle between the sun and the moon articulated through an underlying myth about the theft and repossession of sunlight The Waning Sword Conversion Imagery and Celestial Myth in Beowulf is a welcome contribution to the overlapping fields of Beowulf scholarship Old Norse Icelandic literature and Germanic philology Not only does it present a wealth of new readings that shed light on the craft of the Beowulf poet and inform our understanding of the poem's major episodes and themes it further highlights the merits of adopting an interdisciplinary approach alongside a comparative vantage point As such The Waning Sword will be compelling reading for Beowulf scholars and for a wider audience of medievalists Lampadusa
